STATE IS FIRM IN TREATING ALL ALIKE ON TAXES

Mr, Long Says Edgar B. Davis, Now of Texas, Cannot Receive Preference

MAYOR OF BROCKTON SEEKS TO HELP HIM

Governor Fuller Backs Commissioner on Stand That Oil Man Must Pay

State officials can give no preferential treatment to any one citizen in the administration of the Massachusetts income tax law, Henry F. Long, Commissioner of Taxation, advised Harold D. Bent, Mayor of Brockton, today when the latter called on Governor Fuller and the commissioner in connection with the case of Edgar B. Davis, a millionaire and former resident of Brockton who has taken up residence in ton, who has taken up residence in

The Mayor represented a letter made public yesterday by Mr. Davis, in which he said he had decided upon this change of residence mainly be-cause he feels that the Massachu-setts Income Tax Law is unjust. In the letter, Mr. Davis says: "I realize the necessity of taxation if government is to endure, and desire at all times to pay my just share I consider, however, that the Massa-

is unjust to me."

Mr. Davis is the head of the United North and South Oil Company, which operates near Luling, Tex., and makes his home there. Advice Was Sought

The city officials of Brockton bught advice at the State House as

did not wish primarily to save himself the money which Massachusetts would collect as a tax, but that he might "have the right to determine systems, pointed out Mr. Cheney." might "have the right to determine how much moneys shall be expended." He said that he hopes, through the Luling Foundation, which he had established, to be of some service in improving the conditions of the farmers in the State of Texas where his wealth had originated."

Mr. Long promised to furnish Mr. Boxt a letter explaining Messachus.

Bent a letter explaining Massachu-setts law and pointing out its fair-ness in the view of state officials as compared with other state income

Federal Inheritance Tax to Face State Opposition

O. H. CHENEY"

Banker Expects New Economic Statesmanship

World Output and Distribution Forecast by Mr. Cheney to Chamber

consider, however, that the Massachusetts tax on income, which, incidentally, is about double the tax'
imposed in similar cases by the
great commercial State of New York,
is unjust to me."

Mr. Davis is the head of the
United North and South Oil Company, which operates near Luling.

In the MassaNew competition that may bring
with it a new economic statesmanthink in terms of world production
and world distribution" was described by O. H. Cheney, vice-president of the American Exchangepany, which operates near Luling. in an address before approximately 500 business men today at the final assembly luncheon of 1926 at the Boston Chamber of Commerce.

Service, efficiency and better mansought advice at the State House as to whether there is any way in which Mr. Davis' objections to the act might be satisfied in order to induce him to retain his residence in Brockton.

Mr. Davis said in his letter that he disers and salesmen instead of store-disers and salesmen instead of store-disers and salesmen instead of store-disers and salesmen instead of store-disers.

"Some pessimists have painted picture of New England, desolate— its mills closed by southern compe-tition and its farms and fishing wharves converted into artists' colonies," Mr. Cheney said. "Such a picture is not true to life. I cannot savings bank statistics-of all the is the most thrifty according to these

figures.
"But can the North maintain its position in the cotton industry? What can it answer to the claims of the South? The power cost discrential is now a dominant factor in textile costs. and New England is already turning its attention to its power problem. New England labor is not cheaper but is more skilled and can produce the better grades of goods. It is far from the cotton fields but it is nearer the markets. Can these factors out weigh those favoring the South?

Discounts Tradition in Industry The prediction was made that the stead of American industry—but share of Boston Elevated 7 per cent time is ripe to bring the attention of American industry will not come second preferred stock. Bruce, Prime Minister of Australia, on his arrival here on his way home

(Continued on Page 3, Column 3)

TRENTON, N. J., Dec. 30-Speak ing here at the sesquicentennial called upon Americans to make the sacrifices of peace necessary to maintain the free institutions made possible by the revolutionary patriots' sacrifices in war.

Warning against a resurgence of militarism, the President declared there must be "a change of heart" among the nations if peace is to be founded on reason, and looked forward to the time when they shall have more than "the courage to fight each other"—"the courage to trust each other." Outlining a course of action for the United States in world affairs, Mr. Coolidge indicated that it should combine service with inde-

pendence.

After sketching the campaign that led up to the battles of Trenton and Princeton, and painting a word picture of the hardships and privations endured by the Continental Army on that cold snowy night at Trenton, the President said:

the President said:

Washington and his generals are gone. The bloody tracks which their barefoot armies often left on the frozen ground have long since been washed away. The smoke of the conflict in which they engaged has cleared. The civil strife and disorder which followed have been dissipated. But the institutions which they founded, the government which they established, have not only remained, but have grown in strength and importance and extended their influence throughout the earth.

and extended their influence through-out the earth.

We can never go to their assistance with supplies and reinforcements. We can never lend our counsel to their political deliberations. But we can support the government and institu-tions which are their chief titles to the esteem and reverence in which they are held by the common consent of all humanity.

ossessed of very large wealth. Such a situation has its dangers. In past history it has usually led first to luxury and ease and later to decline and decay. We do not yet appear to be tending in that direction. While we

The Victories for Peace in 1926 Will Be Summarized Tomorrow's MONITOR **Editorial Page**

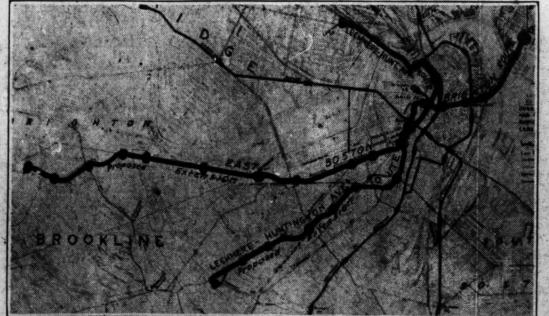

The Larger Freedom The Larger Freedom

The main effort of our revolutionary period, it seems to me, was to bestow upon the individual a larger freedom guaranteed by the authority of law. When the battles were over and the federal constitution with its bill of rights had been adopted, when the federal courts had been appointed and the jurisdiction of the national laws was thoroughly established, the people of this country found themselves in the possession of greater liberties than were enjoyed by any other

ation.
While our political ideals were in any respects an inheritance, and our solitical capacity the result of generations of experience, our theory and orm of a representative system of self-government based on the broad

form of a representative system of self-government based on the broad doctrine of equality, recognizing that the individual had rights upon which not even the Government itself could encroach, was something altogether new in the world. It completely obliterated the old system of class and casts and opened wide the door of opportunity to every talent. What had heretofore been the privilege of the few immediately became the right of

justice and social protection, which will try the criminal and not the that in view of the fact that an investigation was made at the time crime and will measure and evaluate the stock issue was authorized to determine if it were necessary, there Such probation would not do away was no occasion for a lengthy in-quiry to be made as to the justificawith prisons but would prevent unnecessary prison degradation. In addition Dr. Platt recommended a parole board of competent men to de-

quiry to be made as to the justification for a bond issue, as the matter was in the nature of a refunding operation.

A requirement is placed upon the company by which the \$500,000 premium required to call in the preferred stock will be amortized out of the company's surplus. The order requires the company to invest is a nation given over to ease. of the company's surplus. The order requires the company to invest \$100.000 a year in new property or equipment each year for five years on this account. This was explained as being a plan whereby the company rather than the customers will pay this \$500,000 premium expenditure.

The fact is that idleness is no longer fashionable. The American of large possessions has not been afflicted with indolence. Rather, he has been a victim of overstrain and overwork. The class of idle rich in this country has dwindled to such small proportions that it is no longer worth noticing. No doubt it can be said that we have permitted certain types of extravagance, as in the use of our natural resources and in the waste that attends the conduct of much of our daily life, but as a nation it does not appear that we are suffering any impairment through a spread of luxury and ease.

The Larger Freedom

A citizens' housing association in Such associations, in his opinion, should include representatives from all civic organizations interested in housing and home life and should have someone at hearings on questions involving housing.

we have wondered whether a people left entirely to themselves with no restraints except those which were self-imposed through their own political action would be able to exercise sufficient self-control to remain sconomically sound. We have wondered whether there would be enough security for property against confiscatory action, so that there could be sufficient accumulations of capital to finance the needs of a rapidly expanding nation with its many requirements for tremendous investments, to profor tremendous investments, to pro-vide it with the necessary methods of production and distribution.

We have seen that under a republic,

we have seen many great fortunes accumulated. But they do not dominate the people. Rather the people dominate them. Their whole tendency has been toward investment for the benefit of the public. Some of those which stood out as the largest scarcely 25 years ago here here practically all 25 years ago have been practically all bestowed upon charity, while men at that time obscure and unknown have risen to the highest rank in the wealth of our country. Who can doubt that

mind and the soul of the individual. It is not merely a change of environment but a change of environment but a change of the law may help, but only the power of the law may help, but only the power of righteousness can be completely sufficient.

Religion and Education

I know of no way that this can be done and the mans of burdening and oppressing the great mass of the people, have rather afforded them means for a higher standard of living and a greater degree of prosperity than ever before existed. Under our system, the wealth of the country instead of tending to concentration tends to distribution.

If all the large fortunes of the country large for the sevents which secured our independent. The sevent sufficient.

Religion and Education

I know of no way that this can be done as through the influences of religion and education. By religion and education. This is the holy season. All humanity has laid aside the burdens of the day that they might rejoice in the glad tidings of "Peace on earth, good will toward men," Remembering the sacrifices that washington and his patriot army endured for us, we ought not to shrink from sacrifice to make that inspired vision a practical reality.

This has been a long slow, and la-

If all the large fortunes of the country were combined, their amount in comparison with our entire wealth would not be large. The fact is that the great mass of the property of the country is owned by the people of the country. This is the great outstanding fact in the economic life of America. It cannot be too often stated or too strongly emphasized. Instead of retarding, our political institutions have advanced and strengthened our economic condition.

nomic condition.

We are placing a great deal of emto want more. Prosperity is not a cause; it is a result. It is not based on indolence and ease, on avarice and greed, or on selfishness and self-indulgence. It is the result of industry, fair dealing, self-denial and generosity. It is all summed up in a single word. It is character.

len e of American citisenship. To such a people institutions, of course, are important. Our political organization with its representative system and its local self-government, its strong executive authority and independent courts, harmonizes our historical background with sound social principles. Yet this elaborate and well wrought out system would be of little avail

unless the people supply sufficient energy and intelligence to make it work. Unless that be done, there is no system of gove nment that can supply a nation with political salvation.

The Citizen Sovereign

Under our theory, the citizen is sovereign. Whenever he abdicates, some pretender assumes the throne. In large centers of population this has often taken the form of what we term a political boss. The voters cease to function in their sovereign capacity and turn their power over to some individual who rules in their stead. They cease thinking and acting for themselves from their control and come more dividual who rules in their stead. They cease thinking and acting for themselves from their control and come more dividual who rules in their stead. They cease thinking and acting for themselves from their control and come more dividual who rules in their stead. They cease thinking and acting for themselves from the counsel together that they may deliver themselves from their control and come more dividual who rules in their stead. They can be completely under the dominion of benevolence, kindliness, charitableness, and good will. Altogether too much be completely under the dominion of benevolence, kindliness, charitableness, and good will. Altogether too much be completely under the dominion of benevolence, kindliness, charitableness, and good will. Altogether too much be completely under the dominion of benevolence, kindliness, charitableness, and good will. In large centers of population this has often taken the form of what we term a political boss. The voters cease to function in their sovereign capacity

more unscrupulous would not gather unto themselves so large a proportion of the wealth of the country that they would dominate the great mass of the didual who rules in their stead. They need to more of money. But some way people of that stamp do not prosper, do not gain real power.

We have seen many great fortunes accumulated. But they do not dominate the people. Rather the people dominate them. Their whole tendency has been toward investment for the benefit of the public. Some of those which stood out as the largest scarcely. 25 years ago have been practically all bestowed upon charity, while men at that time obscure and unknown have risen to the highest rank in the wealth of our country. Who can doubt that they the side of our country. Who can doubt that these results are even now in the process of repetition? As a general rule with us great wealth has meant great public service.

Wealth Distributed

We have only to look about us to see that under our institutions these conditions, instead of affording a means of burdening and country that they done dominon of the method of relying the fact that they may deliver themselves from their control and come more completely under the dominion of the completely under the dominion of the method of relying to that they have the courage to not faint for them. Their whole tendency holds and permit some one to think and eact for them. They are not willing to make the sacrifice and perform their control and come more completely under the dominion of the method on fear. Nations rejoice in the fact ing to the first some one to think and good will. Altogether too much of international relationship is based on fear. Nations rejoice in the fact which is necessary to support self-government.

When this condition exists there may be many palliatives but there is only one fundamental remedy. Methods of the will have the courage to trust each other?

The warlld have the courage to trust each other?

The warlld have the well-the will have the course of slipping back into the old fo

the great mass of the people, have rather afforded them means for a higher standard of living and a greater degree of prosperity than everbefore existed. Under our system, the wealth of the country instead of tending to concentration tends to distribution.

If all the large fortunes of the country were combined, their amount in comparison with our entire wealth would not be large. The fact is that the great mass of the property of the

failures and many disappointments. No doubt there will be many more in the future. But those who have faith in the power of the individual to work toward moral perfection are willing to intrust their destiny to that method of reform. It is that faith which justifies the American conception of popular sovereignty. There is no other theory by which we could explain the making of the American nation and no other theory on which we can hope for its continuity. It was in this faith that Washington crossed the Delaware.

service With Independence

It is true that the world is compresed, or on selfishness and self-indulgence. It is the result of industry, fair dealing, self-denial and generosity. It is all summed up in a single word. It is character.

True Prosperity

If the country will put its emphasis on this process and remember to practice these virtues its prosperity will become greater and greater, and the greater it becomes the more worthy it will be of our admiration. A more efficient service, one to another, will be the foundation of a greater prosperity and of a stronger national character.

It is nevice with Independence

It is true that the world is comprehend the spirit of service better than it ever did before. We ought to rejoice in that conception. But that theory does not run counter to the theory of independence. The colonies had been called on to fight the European wars on this side of the Atlantic. They had been required to pay tribute to liquidate European debts and support the European military establishment. They had been control of their trade for the benefit of European commerce. They determined to resist these unjust impositions and establish their complete independence.

They did not the another will be compressed in the tone of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European military establishment. They had been colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been called on to fight the European wars on this side of the colonies had been ca

efficient service, one to another, will be the foundation of a greater prosperity and of a stronger national character.

It is never possible to discuss the political institutions which resulted from the American Revolution without realizing that their fundamental conception is reliance on the individual. The whole system of a self-supporting, self-governing people breaks down to the system of a self-supporting self-governing people breaks down to the individual is of a character capable of rising to the great dignity of that position. The whole record of American success is traceable to the excellen 3 of American ditsensing. To such a people institutions, of course, are

Sacrifices for Peace

a people institutions, of course, are important. Our political organization with its representative system and its local self-government, its strong executive authority and independent courts, harmonizes our historical backs round with sound social principles. Washington and the patriots of his day wanted peace. We want peace. Yet this elaborate and well wrought out system would be of little avail

ITALO-GERMAN PACT CONFORMS WITH LOCARNO

French Doubts Dissipated on Treaty Publication-Colonial Needs Stressed

By SISLEY HUDDLESTON

By Special Cable

PARIS, Dec. 30—The doubts entertained regarding the French attitude toward the Italo-German treaty have been dissipated. Evidently the signature to this document is not particularly pleasant for France, but the news is received with complacency and the tone adopted in diplomatic circles is one of resignation. matic circles is one of resignation It is even repeated everywhere tha the treaty is in conformity with the Locarno system. Therefore, no opposition to the new alliance need be expected from France.

It is possible to conjure the inassociation means eventual hostility to France, but officials decline to ac-cept these pessimistic prognostica-tions. In view of the unsatisfactory relations between France and Italy, wever, there is some point in the and arbitration between France and Italy would have been better news. Colonial Outlets

While the general tendency is to importance of cooperation between Germany and Italy from the viewpoint of France, certain critics lay stress on the common need of the two countries for colonial outlets. Italy, deprived of fundamental raw materials, ex-cluded from the cartels, with a surplus population, is not disposed to become a champion of the status

Germany is in a like case. Some of dermany is in a like case. Some of its circumstances differ, but the es-sential point is that Germany consid-ers itself and its people deprived of space. On the one hand in France, therefore, there is a desire for fixity, permanence, a static condition. On permanence, a static condition. On the other, in Germany and Italy, is a desire for fluidity in the dynamic condition. These things are implied perhaps in the Italo-German rap-prochement, but they cannot apply to the text of the treaty. It is impos-sible for France to protest against a treaty by which is is designed to submit conflicts to the arbitration of a conciliation committee on which the majority consists of neutral mem-Criticism Silenced

If the questions are of a judicial character, they may eventually go before the Hague tribunal. This pro-cedure is not applicable when rights obligations resulting from the Locarno Treaty are involved. Nor sulting from membership in the League of Nations be curtailed.

Obviously, nobody can reasonably take serious exception to these terms, which are valid for a period of 10 years. Minor points, notably that the jurisdiction of the Council of the League is ignored, are pointed out. But the criticism which was heard in advance is practically silenced. The criticism, indeed, must confine itself to the general situa-tion and matters not really con-

tained in the treaty.

Nevertheless, it is impossible to doubt that the event is important, and adds diplomatically to the prestige of both Germany and Italy among European nations.

Treaty Is Signed for 10 Years, With Possible Extension to 15 By Wireless

ROME, Dec. 30-The treaty of bitration and conciliation between Italy and Germany which was signed in the Victory Hall of the Italian Foreign Office by Benito Mussolini and Baron Constantine von Neurath, the German Ambassador, consists of preamble and 16 clauses. In the preamble it is stated: "The

President of the German Reich and the King of Italy, animated by the desire to consolidate the friendly relations existing between their respective countries as well as to con-tribute to the further maintenance of the general peace, have decided to conclude a pact of conciliation and

In Clause I the high contracting parties bind themselves to submit to procedure of conciliation in all controversies which might arise between them and which could not be solved in a friendly way through the ordinary diplomatic channels. This rule, however, is not applied to disputes arising from events which took place before this treaty was drafted and which belong to the past.

If the procedure of arbitration

fails, the controversy will be brought before the arbiters or the Permanent Court of International Justice at The

pact of Locarno. Moreover, the pact does not modify the rights or obligations of the contracting parties, their capacity as members of the League of Nations, nor bring any modification of the attributions or

competence of the League. The duration of the treaty is fixed at 10 years, but unless it is de-nounced six months before its ex-piration it is renewed for a further period of five years.

Germany Regards Treaty as Strong Bond of Amity

By Wireless BERLIN, Dec. 30—Special impor-tance is attached here to the sign-ing of the German-Italian arbitra-tion treaty at Rome, since it is the

Happy, New Year

MME. ESTELLE 922 Amsterdam Ave. New York DYER and CLEANER

first treaty of this kind concluded by CHICAGO SCHOOL

first treaty of this kind concluded by Germany with one of the great powers since the war.

The fact that the treaty merely deals with the settlement of disagreements which might arise between the two nations, and that it does not contain any military clauses, and is not directed against any other nation is senectably as any other nation is especially em-phasized by Wilhelmstrasse.

phasized by Wilhelmstrasse.

The improvement of relations between Germany and Italy which enabled the signing of the treaty is welcomed here in view of the great tension which existed between Berlin and Rome a year ago, caused by the Fascist régime in the Tyrol.

The treaty, it is expected, will contribute much toward the strengthening of the friendly feeling between Germany and Italy.

ADMIRAL URGES

Naval Officer Would Allow Many 5000-Ton Cruisers for Police Purposes

By Wireless from Monitor Bureau LONDON, Dec. 30-A strong plea to Stanley Baldwin, the Prime Minister, and President Coolidge "jointly to convene an international conference in 1927, either in Washington or London, to consider the total abolition of battleships, to make the 10,000-ton cruiser the largest unit this site. by Rear Admiral Murray F. Sueter, a retired British naval expert, in

letter to the Morning Post today. Each nation should be "allowed ratio in accordance with the needs for security and protection of trade and world responsibilities," Admiral Sueter declares, and should be lowed to build as many 5000-ton cruisers as it desires for purely police duties. The submarine ton-nage should be limited to each nation's defensive needs, the maximum dimensions and radius of action to be clearly laid down for each submarine unit. Finally there should be appointed, says Admiral Sueter, an international conference under the League of Nations with instructions to draw up concise regu-lations for governing all phases of

As regards cruisers, Admiral Sueter points out, this department, both of the British and the United States navies, is composed mainly obsolete vessels and must in nature of things, be replaced. He adds Britain has "to defend some 80,000 miles of trade routes," and that the question each nation has to consider as regards the number of ressels in any particular unit "mus naturally depend on what other na-

tions are doing."
In connection with a tentative proposal, alleged to have been put for-ward by President Coolidge recently, for a new Washington naval confer ence to discuss the limitation of auxiliary vessels, a representative of The Christian Science Monitor is authoritatively informed that British Government is ready anxious to co-operate with any scheme for further limitation of naval armaments. It would place no prior condition, such as the maintenance of the present ratio of auxillary vessels possessed by the chief naval powers, since in its view such a condition would defeat the ends for which the conference convened.

On the other hand, it would be a sine qua non that all the important

SHORTAGE DROPS

New Buildings Costing \$23,-000,000 Add 31,000 Seats -More Are Under Way

Special from Monitor Bureau

CHICAGO, Dec. 30-Establishing a new record of school building here, 31,000 seats were added to the school system as the result of new buildings constructed in 1926, states John F. Byrnes, business manager of the Chiago Board of Education. The seat shortage has been reduced from 73,000 to 42,000. Schools built in the BATTLESHIP GO year are valued at more than \$23,-0,000. Buildings under construction and expected to be ready for occu-pancy in June are to cost more than \$9,000,000 more.
The building projects for 1927 in-

clude senior and junior high schools in addition to a number of elementary schools, John C. Christiansen, the board's architect, announces "Among the larger projects under way is the Edward B. Ellicott Educational Foundation to be located on the so-called Riverview Park site, comprising approximately 30 acres, continues the statement, "On this technical high school for boys outside of New York City. A group of other buildings are to be located on

A new type of elementary school building, three stories instead of two in height, is being worked out by the architect. The adoption of this plan will result in a saving of money to the Board of Education, it is affirmed. Time required for the construction of buildings is being reduced. Nine months is allotted for an elementary school, 10 months for

GAUHATI WORK

Mahatma' Gandhi Counsels

BOMBAY, Dec. 30-The work at the Gauhati session of the In National Congress has been differently interpreted.

While S. Salyamurti, a Madras leader, in thanking the reception committee, considered the section as poch-making, Srinivasa I Customs Minister Takes the president, in concluding his speech, held that a businesslike program had been drawn up.

Madan Mohan Malaviya, the veteran Congressman who proposed the vote of thanks to the chair, declared criicism of ridicule by eliminating the inconsistency of the program for

benefit and at the same time vote refusal of supplies.

Mahatma Gandhi made an impor-tant speech opposing the independ-ence resolution. He said, "Supposing that complete independence has omething infinitely superior Swaraj, even then I suggest you be patient to attain what is possible at the present moment, and then mount a further step. One step is enough fore me."

The term Sawaraj is not defined and is undefinable, but included, Mahatma Gandhi declared, the Mahatma Gandhi declared, the closest association with the British people on terms of absolute equality. He made it absolutely clear that India wants to remair within the Empire, if it be possible. Mr. Gandhi is opposed to the council program as unworkable, because India is lacking in discipline as a nation.

- VETERAN EMPLOYEES OF CITY RETIRE FROM ACTIVE SERVICE

Combined Service of 12 Workers, Three of Them Teachers, Totals 143 Years-All Go On Pension List, Some at Half Pay

Twelve employees of the city of Boston, three of them teachers in the public schools whose combined terms of service as such amounts to 143 years, are to be retired from active service tomorrow at the close of business on pensions which in some Department. In 1900 a contributory pressures will receive the contributory and the contributory pressures will receive the contributory and the contributory pressures will receive the contributory system was insurgered by instances will amount to nearly one-half of the annual compensations which they have been receiving.

Wilfred J. Doyle, assistant city clerk and chairman of the Boston Retirement Board, announced yesterday the names of the 12 employees who quit the active service of the city to-morrow night. The teachers are:

Miss Mary E. Dean, assistant teacher in the Julia Ward High School, Roxbury, who has taught since Feb. 5, 1877; Miss Mary I. Lapham of the Bowditch School, Wesf Roxbury, teacher since Feb, 16, 1880, and Miss Mary E. Towle, who has been enrolled as a public school teacher in Boston since Feb. 16, 1880, for several years employed at the Wendell Phillips School in the West

Some of the Workers

Patrick J. Doyle, veteran of the Spanish-American War, general fore-man of the highway division of the Department of Public Works, and in on a pension equivalent to one-half of the \$3500 which he has been receiving at the head of the paving established in 1923 for the purpose

this time are: Matron Sarah A.

Smith of the temporary home of the Overseers of Public Welfare; James Kilduff, janitor; Catherine Magee, matron; William F. O'Neil, laborer, and Winifred V. Redding, matron, all a reserve for the retirement of city and Suffolk country amployees the second suppose th of the Park Department; Mary E. and Suffolk county employees. In Nyman, matron and janitress of the accordance with the calculations of

NEW SHOE WAGES RULING SUBMITTED

work Prices Not Fixed

(Special)—Edwin Newdick, chairman of the Haverbill Shoe Board of Arbitration, has released his ruling on the application of the new piece rates in the shoe industry here, mits taken out this year. This year which become effective for a year has been especially notable for the beginning Jan. 1, 1927, stating that the prices would not be fixed prices under certain conditions. The ruling on the piece rates follows:

Building operations as a whole

when the conditions under which two other extraordinary enterprises the work is done are similar to the last year. The total for this year is conditions which the board may reasonably have assumed would prevail the volume of operations promises when the work was done.

the coming year is not the fixed and two large theaters and one or twe established price if it appears to the extensive hotel enlargements. board that the issued price is an New municipal buildings of the error, or issued under a misunder-value of \$322,800 were erected this standing or misconception, or if it year, of which approximately \$315, appears that the conditions under 000 was expended for school pur-

Double Action Shock Absorber Said to Iron Out Rough Spots Connecticut Family Celebrates

Both Pneumatic and Hydraulic in Its Operation, New Device Is Said to Regulate Spring Action Directly as Well as on Rebound

A new hydraulic shock absorber descends, and more and more of the piston rod enters the cylinder, a corcepted by many designers as practicepted by many designers as practicepte cepted by many designers as practi-cally ideal for chassis suspension. It is both hydraulic and pneumatic, re-sisting compression of the springs proportionately to the speed of the blow, as well as controlling their recovery and checking up-throw of the chassis.

The mechanism consists of a closed cylinder fixed to the axles of the car, and a hollow piston rod fixed to the chassis, entering the cylinder through a gland at the top. Secured to the piston rod is a piston head which is not necessarily a very tight fit in the cylinder; the latter, both above and below the piston head, is completely filled with oil. Several holes are drilled through the piston head. These are the controlling orifices or valves of the device.

Spring Movement Controlled When the springs are compressed

by the speed at which the oil in the cylinder can pass through the holes as the piston descends. The same applies to the return stroke as the springs expand again. A slow depression of the springs results in little movement is immediately resisted, shock absorber. Not only since the piston cannot pass through cause the car to hug the the oil more rapidly than the relief the rear seat passengers felt no shock whatsoever when going over bumps or holes. Even at low speed

one side to the other.

The piston rod is hollow and contains a small leather piston not positively connected to any other part of the mechanism. As the main piston cars.

RELIGIOUS SERVICE

DEDICATES HOUSE

HARTFORD, Conn., Dec. 30 (AP)-Wishing to give thanks when their new home in Rocky Hill, near here was completed, Dr. and Mrs. Charles H. Buck adopted a simple but unique program of dedicatory celebration-a religious service.

A special service was arranged by piston rod, forcing the idler piston before it and compressing the air the Rev. E. T. Elliott, pastor of the Congregational Church and four chilabove it. This gives a pneumatic cushioning effect, and introduces an element of elasticity which the main dren of Dr. and Mrs. Buck and the parents of Mrs. Buck took part in the program.

The service opened with appropriate hymns, followed by prayer by the pastor. Scripture passages were read after which came the act of dedication with the family grouped bout the fireplace.

Closing of the Odéon

In discussing "The Odéon and the College Art Association last evening in Sanders Theater, A. Lawrence Lowell, president of Harvard, pointed out that there had not been a time in the history of either the United States or of mankind when wealth had so fallen into the lap of learning as within the last

10 years.
"Now we must feel," he said, "that here is something having a moral for beginning at 10:30. The Mayor is scheduled to speak and the Christmas tree relighted at 12, while bombs are to be exploded on the athletic field. From \$ to 10:30 radio are to be exploded on the athletic field. Treasurer, acted with the knowledge to escape. in new directions, more suc our industries than we have been on the whole, in our learning. But we have a mission, as if we had received a sacred fire, and must keep it alive. "Now, after we have ploughed virgin territory and established great factories, this great audience will begin to sow the seed of the greatest intellectual movement the world has

ever seen. If our country is going to be great it must be now. "There were two great nations in history, both maritime powers. One of them was Athens, who left us the greatest legacy of art, of literature, of thought. The other was Carthage; she left us nothing whatever. Shall our country go down in history as an Athens or a Carthage? The answer rests with you here as-

sembled." MR. HELLER ELECTED

WELFARE CHAIRMAN

At a meeting of the reorganized Board of Overseers of Public Welfare yesterday, Nathan A. Heller, member of the Boston Transit Department and acting member of the overseers, was elected acting chairman in place of Judge Frank Lev-eroni whom Mayor Nichols removed after his election to the chair by the board last week.

that the board would require but \$22,000 additional to the \$150,000 recently transferred to its use by Mayor Nichols whereas the overseers before reorganization had asked for \$50,000. The \$22,000 to be appropriated for welfare this year brings the total amount disbursed over the budget provision to \$172,000 or a total of \$1,926,516.63.

TEACHERS HONORED BY CLASS Henry Pennypacker, former head master of the Boston Public Latin School, and Patrick T. Campbell, present head master, were guests of onor of the class of 1885 at its annual reunion held last evening at

Young's Hotel.
Officers elected for the ensuing year are Charles H. Slattery, for-mer city treasurer, president; Frederick W. Faxon, secretary-treasurer; Prof. P. O. Skinner of Dartmouth College, poet; Norman F. Hesseltine, orator, and Edward J. Bromberg, toastmaster.

PROTEST NEW THEATER Because Zebedee E. Cliff, former dayor of Somerville, is erecting a

theater at 14-32 Grove Street there, in what Anthony Viano, an adjoining property owner at No. 12 calls re-stricted "residential Class C" zone. the latter has filed a bill in equ in the Superior Court, East bridge, against the former, G L. Dudley, Commissioner of Pub Buildings, and five members of the board of appeal of Somerville in an effort to stop the building.

TRANSIT BASED ON FINANCING

(Continued from Page 1)

trict and to improvement of facili-

ties.

In outlining the proposed new rapid transit routes the planning division says it has followed these policies: First, that operation of surface trolley cars into the subways should be replaced by trains. Second, that reserved ways, such as those in the center of avenues and parkways or along railroad rights of way, should be used instead of constructing subways after the crowded dising subways after the crowded dis-tricts have been passed. Third, that the rapid transit routes should cross the city having their terminals four ty rather than terminating down

Shies Off Governor Square

The report makes no clear-cut rec dation as to solution of the nuch-discussed traffic problem a Governor Square, though recogniz-ing its seriousness and admitting that the congestion there slows down the operation of the Boylston Street subway. The report makes no mention of the plan recently offered by Henry I. Harriman, chairman of the division, for a ramp to serve the acon Street lines, but says that delays at the square may be sub-stantially relieved by a traffic regu-lation forbidding left-hand turns by automobiles, or entirely overcome by

Provision for a subway extension at this point is included in the esti-mate of cost of the Brighton-East Boston train route. New tunnel and station workflon the down-town section of that route is estimated to cost \$3,533,000, the Governor Square sub-way \$2,500,000, and the extension of

Cost of the Lechmere-Huntington eral would be needed for construction from Broadway south, and the remainder would be for changes involved in the existing subways. This route, it is planned, would take the place of all the surface car lines which now enter the Boylston Street Subway from Huntington Avenue as well as those which enter the Tremont Street Subway at Broadway. Passengers for these lines would ransfer at Broadway or at the Rox-

Secondary Group of Projects A secondary group of projects, which the division recommends for

Extension of a rapid transit line from Lechmere Square to North Cambridge over the new northern traffic artery and along the Boston & Maine

right-of-way.

Construction of a high-level bridge over Chelsea Creek to provide a sur-face route approach from Chelsea and Revere to Maverick Square, together with a working agreement be tween the Elevated and the Eastern Massachusetts Street Railway for a 10-cent fare for this territory.

Purchase of the Atlantid Avenue elevated railway structure by the City of Boston and conversion of it into an elevated highway. Electrification of the Old Colony division of the New York, New Haven

& Hartford Railroad and the Newton circuit of the Boston & Albany Rail-

road for rapid transit service.

Removal of the elevated structures through Charlestown and their replacement by a new elevated route over the Boston & Main Railroad of the structures and district lodges from 597 to 614.

Since the last issue of the Year Book from 100ges from 4105 to 4195, London lodges of eight Craft lodges, five Royal Arch chapters, one Mark lodge, one Royal to 991; provincial, from 2467 to 2520, and district lodges from 597 to 614.

Templar preceptory, and one Rose from 100ges from 100

over the Boston & Maine Railroad But already, since that volume was yards between North Station and Sullivan Square. Does Not Reject Prior Proposal

In dealing with the finances of the and two in districts overseas. There Boston Elevated Company, the planning division does not reject the proposal recently aproved by a special posal recently aproved by a special gether to form the new District of commission reporting to the Legislature to the effect that Boston should Jacob Barth was recently installed purchase the elevated structures of as the first District Grand Master. the transit company's main line from of Provincial Grand Masters and two

The division agrees that "if the City of Boston is willing to lend its credit to the extent of \$30,000,000 and the Elevated is willing to sell its structures," the plan may be worked out. But it points out that the city would be incurring a "very heavy obligation" for an existing transit facility in order to furnish the Elevated system with capital, and on the whole prefers the financial reorgani-

The commissoners of the planning division, by whom the report was pre-pared, are Henry I. Harriman, chairin; A. C. Ratshesky, vice-chairman; Ralph S. Bauer, Mayor of Lynn; Richard K. Hale, commissioner of public works; Everett E. Stone, commissioner of public utilities; Frank G. Hall and James B. Noyes. Edwin H. Rogers is chief engineer of the di-

The Metropolitan Planning Division has given a great deal of attention to its study, and has produced a report which contains much excellent

"In view of it we should proceed with the matter closest at hand, that is, the extension of the Boylston Is, the extension of the Boyiston Street Subway under Governor Square. The City of Boston is immediately and directly interested in this improvement, primarily for the reason that it should bring the Boyiston Street Subway to the use for which it was originally intended, that is, the routing of through car trains. This will make possible a real rapid transit, such as we have not had transit, such as we have not had up to this time in the Boylston

Street Subway.
"It is my opinion that our attention should first be directed to this improvement. The legislation for the city having their terminals four this has already been authorized, or five miles from the center of the and I think that it should be assumed without delay by the Elevated. I do not think it should await the major questions relating to the operation and management of our transportation system."

LAND BANK INQUIRY RESULTS REQUESTED

Arthur F. Blanchard, Representative from Cambridge, today filed a resolution under which he will seek to have the Massachusetts Legislature call upon John G. Sargent, Attorney-General of the United States, for information as to the findings of the Federal Government in its reported investigation of joint stock land banks.

Mr. Blanchard, who already has introduced bills for an investigation and state supervision of banks, also made public a letter Paddock, deputy governor of the Federal Reserve Bank of Boston. The letter inquires whether Mr. Paddock can furnish any informarapid transit service over Common-wealth Avenue including the Warren and extraordinary decrease in the Street terminal, \$1,423,000, a total of value of these stocks," and whether there is "any way by which the Federal Government can reimburse those investors who bought these Avenue route is estimated at a total those investors who bought these of \$7,500,000, of which \$6,400,000 stocks under the assurance that they were protected by rigid Government

CONCORD, N. H., Dec. 30 (AP)-Distribution to cities and towns of its source of the money received under the New Hampshire tax on infrom interest and dividends, totaling \$442,176, was under way today at the office of the State Treasury. The figure this year compares with the \$421,893 in 1925.

NICARAGUAN SAYS RADIO IS CENSORED

Liberal Agent in Washington Asserts Messages Are Blocked by Americans

Special from Monitor Bureau WASHINGTON, Dec. 30 - Since the landing of American troops at Puerto Cabezas, Nicaragua, so called capital of Dr. Juan B. Sa-casa, Liberal leader, the Liberal Party has not had access to the outside world by radio except through the medium of a censorship imposed by the American forces there, who have practically cut off communica-

This is the statement of Dr. T. S. Postal Telegraph-Cable Company, the Tropical Radio Company, and the Compania Radiografica Interna-cional, mentioning the censorship or citing it as the reason for the non-

delivery of messages.
Frank B. Kellogg, Secretary of State, in daily conferences with newspapermen, has denied reports that an American censorship had announced policy of neutrality but he has now promised to make inquiries with the Navy Department as to what measures Rear Admiral Julian L. Latimer, commanding the American forces in the neutral zones at Puerto Cabezas, Bragman's Bluff, and Bluefields, has taken in regard to the Liberals' only means of communication with the outside world. No Word Since Landing

Dr. Vaca states he has not been able to get word to or from Dr. Sacasa since the landing of American forces Dec. 24. Messages from Liberal agents in Nicaragua, Costa Rica and Mexico state they are similarly cut off. Thomas P. Dowd, superintendent of the Postal Telegraph-Cable Company, in a letter to Dr. Vaca dated Dec. 29, states that the Tropical Radio Company an-nounces it cannot accept messages in code for Nicaragua, via Brag-man's Bluff. Mr. Dowd says that "Messages in plain Spanish may be accepted, but subject to censor's decision.

Telegraph-Cable Company had pre-viously announced to Dr. Vaca that a message sent in Spanish two days before had not been delivered. The

Communication with Dr. Sacasa, whether in code, Spanish or English has been cut off, Dr. Vaca asserts, and he is making representations to Mr. Borah and the State De-

Attitude Changed A Republican senator of the highest rank is authority for the declaration that within the last 48 hours the considerable extent its attitude to-ward Mexico on the oil and laws

and on Nicaraguan intervention.

The informant, following a length; conference with Mr. Kellogg, stated that he had found a much-changed viewpoint toward the Mexican and Nicaraguan problems, and expressed confidence that the difficulties that had arisen would be solved without 'a diplomatic crisis.'

Senator indicated that where as he had found an opinion current in official circles that a break with Vaca, agent of the Nicaraguan Liberal Party in the United States, who presents signed statements from the fect that a way out would be found without resorting to drastic meas

ures. Influences for Harmony The influences that caused the tempering of the State Department's policy, the Senator said, were both known and confidential. Of the known influences, the two most important in his opinion were: The widespread public disapproval of a break or intervention, as manifested by the press of the United States and Latin-America and the acceptance of the Mexican Government's terms by many of the largest British and

American oil companies. Two Democratic senators made known widely diverging views con-Joseph E. Ransdell, Senator from Government's attitude, while Burton peared in concerts in Germany, K. Wheeler, Senator from Montana, England and France and made an characterized the policy "as either opera bouffe or a shameful tragedy."

Mr. Ransdell viewed the activities of "Communists in Mexico" as re sponsible for the difficulties in Nicaragua, which he felt "might spread throughout Central America and result in a Communistic union of Mexico with the other Central American states, of which Calles aspires to be the ruling spirit." Mr. Wheeler declared that unless American marines were at once withdrawn from Nicaragua, he would introduce a resolution in the Senate next week calling on the Administration to intervention.

which the division recommends for further study with a view to future development, include these:

Extension of the East Boston tunnel to the Wood Island station of the Revere Beach Railroad, and acquisition of that road by the Elevated.

Extension of a rapid transit line pares with the \$421,893 in 1925.

The city of Manchester receives the Second with \$48, 549,203. Concord is s William E. Borah (R.), Senator situation with the State Department and after seeing messages from Ad- elected to the board of trustees. The miral Latimer, in command of other members of the board are R. S. who will be in charge of the insti-tute, said that the venture was prompted by demands from adults employed during the day. When the arrangements are in working order, Northeastern will have two day schools and two evening, Mr. Churchill said. More than 1500 students are expected to matriculate in the Lincoln Institute next fall.

SMITH ALUMNÆ ON SCHOOL BOARDS

Six of Seventeen Are Serving in Larger Cities

NORTHAMPTON, Mass., Dec. 30 (Special)-An increasing number of Smith College Alumnæ find that service on a school board offers an unusually congenial and valuable way of continuing or reviving one's educational interests. The Smith Smith College Alumnæ find that Alumnæ Quarterly reports from a on central European politics, will recent investigation that at least 17 speak on alumnes are now serving or have realumnæ are now serving or have re-cently served on school boards.

Three are serving in rural villages, six in large cities and eight in suburban or residential communities. Of these, three are living in New England, five in New York and New Jersey, five in Ohio and Illinois, two in South and one on the Pacific coast

When asked if they had been able to push any measures that men members might not have been interested to put through, these women replied with a long list of progres-sive measures, of which the following are examples: provisions for athletic equipment for gifls as well as boys, contact with museums of art and natural history, cheap tickets for orchestral concerts, improvement in sanitation and upkeep of build-ings, safety of children on the streets and in the school yard, and better accommodations for teachers.

As one alumna points out, change in instruction or course of study problems of overcrowded buildings or classes make far less impressio on a business man's board of educa tion than the addition of a few cents to the school tax.

PRIVATE CAPITAL MAY BUILD BRIDGE

Mount Hope Bay Project Would Cost \$4,000,000 NEWPORT, R. I., Dec. 30 (A)-The

proposed Mount Hope toll bridge William Mack and Dr. Henry G. across Mount Hope Bay from Bris-MacAdam of New York were re-tol to Portsmouth, may be built by private capital from New York. Financiers from New York have horoughly examined the project and have expressed a willingness to un-dertake construction which, it is esti-mated, would cost \$4,000,000, Herbert

> day.
>
> Mr. Smith has long been interested in the bridge project, which would give a direct route of communication etween Newport and Providence. He said that he had received a telegram setting forth the willingness of the New York eapitalists to construct the bridge and that steps would be taken immediately to obtain the necessary permission from the coming session of the General Assembly.

LOWER TAX RATE IN LOWELL FORECAS

LOWELL, Mass., Dec. 30 (Special) Speaking on the textile situation in New England, Henry Achin, Representative in the State Legislature for the last 15 years, said today that Lowell will reduce taxes in the coming year and will otherwise co-oper-

"The labor here is first class and has shown a willingness to co-op pliance with a law passed by the last the people. They realize more and more that their success depends They are as follows: Broken coal, upon the success of textile and other industries. Through the efforts of its finance commission Lowell will reduce taxes this coming year \$3 per \$1000 and during the five-year term of office of this commission the tax rate of Lowell will. I believe by

Long Island Sound Gull Has Fondness for Flapjacks

NEW LONDON, Conn., Dec. 30 (AP) "Brown the wheats for Barney" is a frequent cry on board the Bartlett's Reef lightship, anchored in Long Island Sound off New London harbor. Barney is a huge seagull, leader of the flock which continually hovers is the retiring president of the counabout the ship. Members of the crew have adopted him and never have was handicapped from this cause no any difficulty in identifying him because of his great size, white breast, whitish back, blotched tail and yellow beak.

When food is thrown overboard the other gulls wait about deferentially until Barney has had his fill. Flapgobble them up in short order.

ALUMNUS OF '77 GIVES \$1000 Celebrating the fiftieth anniversary of his graduation from Harvard Law School, Grenville H. Norcross, ton attorney and president of the Bostonian Society, took that occasion to contribute \$1000 to the school yesterday. Back in 1877, when Mr. Norcross was graduated the school had about a third as many students from 20 colleges, while today there are 200 colleges and universities represented there, it is recalled. The library has also grown from 20,000 volumes to 280,000 at present.

Truthful Geography Books Are Advocated to Teachers

PHILADELPHIA, Dec. 30 (Special)-A plea by Miss Erna Grassmuck, Pennsylvania State director of geography, for more truthful text-books in the schools was the feature of the closing session of the Na-tional Council of Geography Teachers, just held at the University of Pennsylvania. Miss Grassmuck, who cil, declared that geography teaching DOLLAR LINE ALTERS BOOKINGS only in Pennsylvania, but throughout the whole of the United States.

"Inaccuracies, falsehoods and unsocial ideas are being planted in the minds of children in the first, second Van Buren leaving Boston on Jan. and third grades by the stories and 12 for a voyage around the world, until Barney has had his fill. Flap-reading lessons now in use," she were announced today from the local jacks are his favorite delicacy and said. "There is grave danger that office of the line. The President Harthe sailors delight in scaling them children are getting erroneous no-out over the waves and watching him tions of the people of China, Italy, where repairs are being made on the Hawaii, Japan, Germany and many other countries.

"Geography is becoming a profession for others than teachers. The junior-senior high schools must recognize this and provide courses which will enable students to follow geography as a vocation. There are now nearly 1,000,000 Government employees, most of whom ought to have been trained in geography in the junior-senior high sche order to give proper service to the Nation. No geography teacher's preparation can be called complete until she has traveled and s geography as she traveled. She should be required to see some of the world before she starts to teach

Speakers and the subjects which they will discuss at the Foreign Affairs School at Radcliffe College from Jan. 11 to 13 were announced today by the Massachusetts League of Women Voters which conducts the school annually in co-operation with Radcliffe and Harvard.

Prof. Charles Hodges of the University of New York, who is to conduct the first session will give a digest of world affairs illustrated with maps and charts. He will be College.

Japan and the Occident Closing the discussion Wedne evening, Upton Close takes for his subject "Japan's Relation to the Western World." Perhaps no other

American has had the same oppor-tunities to know both China and Japan that Upton Close has secured for himself. His experiences following the occupancy of a chair in history at Washington University, his war service, his connection with the Department of State, his friendships, give him an unusual basis for

The last day's program will be given to Pan-American problems and critical national questions. Clarence James W. Angell, one of the group of Columbia University specialists in economics and history, who recently advised the calling of an international turn on "What South America Thinks" pean debt situation, will lead the discussion Tuesday evening. His subject will be "The Relation of the European Debt to America's Foreign Policy." Edward A. Filene and Feen of "What South America Thinks of Pan-Americanism and the Monroe Doctrine." The second period will be given to "Mexico Today." John F. Moors, member of the Radcliffe Council, will lead the discussion, and the on "What South America Thinks of Pan-Americanism and the Monroe Doctrine." The second period will be given to "Mexico Today." John F. Moors, member of the Radcliffe Council, will lead the discussion, and the an officer in the Mexican Federation of Labor, a soldier under Madero, Obregon and Calles, and a teacher in Mexican schools.

The final session, Thursday afternoon, will open with a lecture given by Miss Sarah Wambaugh, technical vent war committee of the Massa-chusetts League of Women Voters, presiding that afternoon, will bring the school up to date as to the United tration of the Secretariat of the

TAX TREATMENT

(Continued from Page 1)

eral estate tax is spreading. It is believed by the leaders of the national committee that the state legislatures are in a strategic position to voice the popular demand for repeal of the tax. This should be done at the present session of Congress to pave the way for action whenever the general revision bill is taken up, according to the statements of some

delegates. It was recalled that President Yale, told them that the sum needed could be subscribed if each member proval of the plan by which the Fedraised \$324.69. Albert J. Beveridge, chairman of the national committee from the estate tax field and the in charge of the raising of the en-dowment fund, will continue to from the income tax field. MAYOR NICHOLS SEEKS NEW SHIPS FOR BOSTON

Greater use of Boston as a port for trade to and from South America was urged foday by Mayor Nichols upon the United States Shipping Board, in the following telegram to Washings

"Understand hearing to be held tomorrow regarding re-allocation Shipping Board South America Service. Strongly urge you consid claims of Boston operators in view of Boston position as large distributing center for South American products

Plans to transfer the cargo and passenger bookings of the Line steamer President Harrison, sailing of which from Boston on Dec 29 was canceled, to the President underwater section of the hull which was damaged when the grounded in the Yangtse.

FEDERAL APPOINTEE HONORED George L. Farnum of Melrose, recently appointed an Assistant Attorney-General of the United States, left today for Washington to enter upon the duties of his new office. More than 100 leading Melrose citizens attended a luncheon held in his honor in the Melrose Chamber of Commerce yesterday. Mr. Farnum re-sponded to an address by Claude L. Allen, who voiced the well wishes of the gathering.

MAYOR PROMOTES G. H. FOSS PORTLAND, Me., Dec. 30 (P)—The directors of the Associated Industries of Maine yesterday re-elected George F. Reynolds of this city as president. The other officers also will serve another year.

Mayor Nichols today announced the promotion of George H. Foss of Waldeck Street, Dorchester, to the position of general foreman, Public Works Department, at a salary of \$3000 a year. This vacancy was caused by the retirement of Patrick H. Kyle. Mayor Nichols today announced the

H. L. JOHNSON JR. Black Hawks Take VS. F. X. SHIELDS

Seligson and E. Jacobs Meet in the Other Junior Tennis Semifinal

BALTIMORE, Md., Dec. 30 (P)—Upsets yesterday gave the United States indoor junior and boys' tennis champoinships added interest of unexpected competition as slates were cleared in the lower brackets.

The first reversal in the junior division ricocheted from the capable handled racques of Henry L. Johnson Jr. of Waban, Mass. In a slashing three-set match he outsteadled Donald Strachan of Philadelphia, a protégé of William T. Tilden 2d, and aligned himself to meet Frank X. Shields of New York in the semifinals today.

In the other semifinal bracket, the vagaries of the seeding have operated to deprive Julius Seligson of New York, junior title defender, and Edward Jacobs of Baltimore, last year's runner-up, of the possibility of another set-to in the finals. They clash today for the right to meet Shields or Johnson in the title match.

With the Baltimore ace's brother, William Jacobs, zooming through the

CHICAGO, Dec. 30-Overcoming feated the Montreal Maroons 5 to 4 in an overtime game of the title race in the National Hockey League at the Collseum here last night. Chicago thereby captured the leadership of the United States division of the league, going ahead of the New York Rangers and the Boston Bruins with whom they were tied. One of the largest

crowds of the season, 7000, witnessed the thrilling contest. It looked like a Montreal win for earned several good chances in this period. Once Duncan Mackey, center, skated close-in on Clinton Benedict, Montreal goalie, who laid down on the

Montreal goalie, who laid down on the ice to save.

Two follow shots found Lehman off guard at the start of the second period. In 35 seconds Duncan Munro followed a shot and scored the rebound. Two minutes later Siebert scored his own rebound through Lehman's late clearing. Chicago's first score came 4m. 40s. later from Cecil Dye's stick on a pass from McCullooch Wilson. Eleven minutes later Dye scored again on a pass from Richard Irvin, center. At the end of the period the score was 4 to 2.

Brilliant defensive work by Benedict prevented Chicago from scoring in the opening minutes of the third period, when two Marcons were off the ice with penalties. It was 18m. 45s. before the Black Hawks scored, Irvin dashing in unassisted. With 50 seconds to play Chicago sent five players into the attack and McVeigh scored unassisted. In the second overtime period, Mackay took a pass from Dye to score the winning goal in 3m. 30s. The goalies made 49 stops each.

GAME FRIDAY Minneapolis at Chicago.

Minneapolis at Chicago.

WINNIPEG, Man., Dec. 30 (Special)

—Duluth defeated the league-leading Winnipeg Marcons 4 to 3 in an Americah Hockey Association contest before 4500 fans here last night. Marcons led until the final period when Duluth scored two goals to win. The game was featured by 22 penalties, each team drawing 11.

The Marcons assumed a 2-to-1 lead in the first period, Clifford O'Meara scoring the first goal on a shot from center and Goodman tying it on a pass from Skinner: but Winnipeg went ahead when Brown, scored on a threeman rush. In the middle period each side scored. Goodman evened the score on a pass from Jamieson; but in the final minute Borland scored on Somer's rebound after Stanley rushed and passed.

Coaches Against Attitude Displayed Toward Football

Alumni, Student Bodies, General Public, and the Press Criticized by Association-Recommendations Proposed to Improve Conditions

Special from Monitor Burees

NEW YORK, Dec. 20—The most could be put in play. This was on the proposal of William W. I head couch at Primeton University of American Surface of Primeton University of American Surface of Primeton University of Primeton U the alumni, the student body of Amer-

and the press toward football, ever publicly made, was the feature of the annual meeting of the American Football Coaches Association, at the Hotel Astor yesterday.

In a report made by the executive committee, of which John W. Wilco of Ohio State University was chairman, it was stated that in a survey of 120 American universities during the eight years since the end of the war, it had been ascertained that the average life of a coach in football was only 2 1-3 years, with an average of 3 1-7 coaches for each university during the period. Only eight universities had retained the same coach through the entire period, while in 140 cases the entire tenure of office had been one year. Altogether 379 coaches had been employed.

The causes for this abnormal state

The causes for this abnormal state of affairs, which was forcing many fine coaches out of the profession, were threefold, according to the report. They were stated as follows:

The demand of the alumni, the

1. The demand of the alumni, the student bodies and the general public, for winning teams.
2. The temporary and unstable, nature of athletic control and organization in colleges.
3. The tendency of the general public and especially the press to act as a mouthpiece for disgruntled alumni, and captious critics among the student bodies, without considering the difficulties involved in the development of real teams.

To meet these conditions, it was rec-

To meet these conditions, it was recommended that football practice be confined to not more than two hours a day, and that all preliminary practice previous to the start of the colleg-year, be confined to the campus and athletic field of the institution. Also that the government of the athletic activities of the institutions be made stable and brought closer to the genral management of the institution

eral management of the institution.

The current discussion in regard to the huddle and the shift received more attention from the coaches yesterday, but little was accomplished on behalf of those who wish drastic changes to prevent them.

Early in the day a resolution was adopted providing that in every case, two seconds should elapse after the attacking team reached its position, after

SOCCER MEN BUY

American professional soccer was completed here yesterday when the new owners of the Providence Soccer-Club of the American League purchased the entire Springfield team. Nine players will come to Providence and the amount involved approaches five fig-

lanager Samuel Fletcher of the Providence team declared the purchase was arranged in an effort to improve the standing of the Providence team and to give fans in this vicinity a cham-

to give fans in this vicinity a championship brand of soccer.

Hugh McNair, Dennis Lawson, William Finlayson, James Black, James McConnell, William Ballantyne, Hugh Reid, Bert Campbell and Douglas Stewart are the Springfield players who will come to Providence. All of the players came originally from England, Scotland and Ireland.

As soon as news of the Providence men's attempt to secure the players was spread in football circles, many belated offers for Springfield men were made from other clubs. Nate Agar of

belated offers for Springfield men were made from other clubs. Nate Agar of Brooklyn and Samuel Marks of Fall River were among the bidders. Seven Springfield men who are not to appear in the Providence lineup are to be released and Manager Fletcher will open negotiations today for the transfer to other teams of Providence players whom he must dispense with in order to make way for the reinforcements.

McGILL SIX WINS IN OVERTIME, 4 TO 3

McGill University defeated Harvard University, 4 to 3, last night at the Boston Arena in an overtime hockey game. A long shot by Roger McMahon, nine seconds after the first overtime period started, gave the McGill col legians victory.

The game was inclined to be rough

because the referees were not strict enough. Harvard piled up a lead of "Say It With Flowers"

BETTER PRESS TALENT/URGED

Editor Advises Teachers of Journalism to Seek High Grade Students

COLUMBIS, O., Dec. 30 (Special) tion. Fewer bit better students were presented as an ideal for schools of journalsm by Erie C. Hopwood, editor of the Cleveland Plain Dealer and

a higher grade of talent for newspaper work and to insure positions for graduates. The purpose of the schools, he maintained, should be to develop a few outstanding men and women qualified to investigate, mas-ter and present difficult subjects accurately. On the other hand, he said, newspapers must learn to pay such persons enough to hold them in the profession.

"The great trouble with the American newspaper," he asserted, "goes right back to the reporter. With the right personnel on newspapers many of the criticisms now heard will go by the board." Mr. Hopwood advo-cated emphasis on the social sciences in preparation for journalism. Less effort should be made by the schools in his view to ape the newspaper office and training newspaper technique should be merely supplemen-tary to study of basic subjects of human importance. As qualifications for teachers of journalism he urged a liberal education, specific knowledge of newspaper work, and ability

Should Not Lose Actual Contact The teacher of journalism, he pointed out, should return occasionally to actual newspaper work in order to keep abreast of changing He warned instructors against stamping out originality and spontaneity among students, and called attention to lack of life and freshness in college newspapers, which he attributed to the faculties.

Roy L. French of the University of North Dakota, president of Sigma Delta Chi, professional journalism fraternity, appealed for the inderstanding, confidence and help of all teachers of journalism, and pledged in return the same qualities from the fraternity. Mr. French laid stress on the efforts of the fraternity not only to develop high ethical ideals, but also to maintain advanced standards of scholarship. He announced that the organization hereafter would in each institution award a scholarship key to every journalism graduate member or non-member who should have a scholarship average of 90 per cent or its equivalent.

Mr. French predicted that in the near future the fraternity would decline to initiate any student whose scholastic average was under 85 per cent. He directed attention to the serious thought of the undergraduates on problems pertaining to the profession of journalism.

Poor Newspaper Readers

Financial prosperity has made the American a poor newspaper reader, M. Johnson of the University of Minnesota told the convention. Professor Johnson criticised editors for
giving less attention, than do advertising men, to analyzing the characteristics, interests and needs of
readers.

Then the orchestra leader raised his
baton and the unison in which everybody sang and the spontaneity with
which the audience joined in made
"old timers" in Broadway wonder for
a minute, for it all seemed so strange Minnesota told the convention. Pro-

Iowa set up as criteria for journalown profession, have marked skill and rapidity in it, possess such intellectual vigor as will advance his profession beyond its present status

year, he stated, he gives his fresh-men a test in the spelling of 80 words busiest of Manhattan streets at the chosen from newspapers and in no hour when the hundreds of theaters year has he found 10 per cent of them rectly. The criticism was echoed by after the play. Grant M. Hyde of the University of

LAKE DIVERSION PACT FAVORED

Forms Dominant Factor in Lakes-to-Gulf Waterway, Mr. Newton Says

Special from Monitor Bureau mer country is really ahead in CHICAGO, Dec. 30—The Federal Waterways bill probably will be ac-cepted with United States Senate amendments and signed by President some activity in the shipbuilding yards. At Elsinore, a contract has been secured from Norway for a tank steamer of 9000 tons equipped with Diesel engines from Burmeister & Wain of Copenhagen, the pioneers of the Diesel motor for vessels. Coolidge, it was predicted here by Cleveland A. Newton (R.), Repre-sentative from Missouri, who has worked for passage of the Illinois waterway project, which would form a deep channel from the Great Lakes to the Gulf of Mexico. He addressed the Chicago Association of Com-

The movement for the waterway should not cease now, he cautioned, declaring that it is imperative that there be a definite agreement allow ing diversion of water from Lake Michigan at Chicago, a practice which Wisconsin and some other lake states are attacking in a suit before the United States Supreme

Through Productive Area

Mr. Newton remarked that diversion has lowered the lake level six inches and that it will not be lowered more in a century. He pointed out that diversion makes possible for all time a great waterway from the Great Lakes to the sea, through the most productive area in the United States and that this is bound to be a great national asset for all time. Without diversion of water here the waterway project would be impossible and with it engineers have figured out means of raising the level

Two waterways to the sea are needed here, he emphasized. One should be to the Gulf of Mexico and the other through the northeast, he

The beneficent effect of a chear ater transportation system would hind prison walls and bars, but be felt throughout the entire nation. ne showed and predicted that when the government-owned barge line State Prison an appreciation of the running from St. Louis down the Mississippi River could profitably and safely be replaced by a privately operated system, the Government probably will give up that enterprise. Comparison With Europe

He showed that in Europe water way rates are one-fifth the rail rate and that the Government line on the Mississippi, even with some limita-tions, is serving at one-third the existing rail rates and making a good profit too. Railroads serving the same territory have not been injured by the barge line, either, Mr. Newton commented as significant. He pre-dicted vast industrial development of cities on the Great Lakes, when the waterway project has been com-pletely carried out.

pose of buying toys and Christmas goodles for the little kiddles I have been reading about in the papers. It isn't much, but it will help. I am The chief problem before Chicago concerning this waterway project is that diversion of water from Lake Michigan must be legalized to make it a certainty, Mr. Newton emphaserving 15 years and have lots of time to repay it to my credit. Mr. Mackey, I will feel very grateful if sized, aand he declared that there is The request met with ready acquienough patriotic sentiment in the escence on the part of the warden, and although the gift represented quite all the donor had, he assuredly found his own holiday joy in the United States to make this possible He urged a campaign of education to bring the true facts of the situa-tion before the Nation, and to con-vince all of the possible benefits to all that could result. knowledge that he had given un-

ASKS NICABAGUA BE LEFT ALONE

Kirby Page at Milwaukee Student Conclave Criticizes Marines' Landing

MILWAUKEE, Wis., Dec. 30 (Speial)—Landing of United States marines in Nicaragua was protested at the National Student Conference here by Kirby Page of New York, who also criticized what he characterized as a "heartless debt col-lecting policy" toward Europe. The peoples of Europe, he said, had made genuine progress toward reconcilia-tion and peace during recent months, but added that there were Bishops' Conference Has Long still more potential causes of war in Europe today than there were in

"More bitterness is being generated by the interallied debt situation than by any other single problem of the hour," Mr. Page declared. "Ever since the armistice England has been urging the calling of an international conference to consider all phases of the debt problem.

"The United States has taken the position that the allied debts are egal obligations and are therefore adependent of reparations. The independent of reparations. east that we ought to do is to be willing to participate in such a con-ference and to be ready to do whatever needs to be done in the light of all the economic, political and psy-chological facts."

Mr. Page then asked his student audience of 3000 youths to destroy the war system, to build up a new and higher type of patriotism and to put America into organic relationship

with the rest of the world.
Dr. Timothy T. Lew of Yenching

Architecture—Art—Theaters—Musical Events

Edward H. Bennett on Classic Forms and City Plans

Special from Monitor Bureau CHICAGO-Business may find expression in skyscrapers, but nothing better than the classical column and pilaster and their combinations with tion and co-operation governed these the arch has been found for buildings of a public character. This is the opinion of Edward H. Bennett, recently appointed consulting architectural specialist for the building program of the United States Treasury and consulting architect of the Chicago Plan Commission.

While new forms have been sought, classical style remains supreme for buildings called monumental, Mr. Bennett observed.

of Greek or Roman buildings. Structures of one or two stories in the midst of skyscrapers are anomalies, Mr. Bennett said. Adjustment will essential in composition is that there be style rather than any particular tyle. In Chicago, for example the large tyle and shade. City Hall-County Building conforms largely to the demands of monumental architecture, yet rises to a height of 10 stories, the architect noted. This is made possible by the colossal

Bennett continued. "The architectu-ral order, with its columns and entablature enclosing one or more stories, s in a sense a measure of man in his highest architectural expression. The column—capital, shaft and base —is a symbol of the human being, with head, body, and feet. The superposed order-one complete unit of columns and entablature placed over another-has not been well tried out in the United States. It is successfully used in the pavilions of the Louvre. But it is not proved possible to extend even this form to the height

of skyscrapers."

The new buildings to be erected in been set for federal buildings, he ex-plained. The important work now is plained. The important work now is to see that the eight or more new the wanderings of Abraham into the buildings are so grouped, with open spaces between them, that the result a fine whole, not an area resembling an industrial district.

Andrew Mellon, Secretary of the

One stage of city planning has reached a successful climax in Chi-

well placed, but the tendency to build still other important public buildings on the lake front should be checked, the city planer maintained checked, the city planner maintained. Planning should develop the whole city, not merely a show front. This is in accordance with the original Chicago Plan, under which much already has been done for the west side by an extensive program of street widening.

Comparatively low property values in the business section south of the loop and west of the Chicago River are another inducement for develop-ing a civic center outside the "loop." Mr. Bennett continued. If a plan is Mr. Bennett continued. It a plan is followed, new buildings required for this city can be grouped so as to create a fine whole, without addi-

tional expense to the city.

Mr. Bennett's proposal would group the four or five important public and semi-public buildings, which are on to be erected, on an east west street spanning the Chicago River. This would allow the civic

brought together nearer the main business district, Mr. Bennett does not give up the west side development. This civic group could eventually lead to an additional center farther west. All on the main axial the symphonic ballad. "The Voy-

The urgent thing now is to plan the location of the new buildings before anything permanent is built which would make such planning too difficult of achievement, the champion of the City Beautiful emphasized. Already a new Parcel Post Building crosses the path of the proposed Congress Street Improvement. By deflecting traffic of widened Congress Street improvement. By deflecting traffic of widened Congress Street around it in two directions and widening the two parallel streets this difficulty can be mastered. The buildings could be placed in the area including Con-

gress Street and so spaced and designed as to give the effect of monumental architecture.

"A two level development of traffic circulation could be brought about greatly to the advantage of city traffic," Mr. Bennett added. "The whole development could be connected up with streets to be extended south by reason of the river straightening and also with the railway terminal development. Great things might be done if co-ordinathings might be done if co-ordina-

New York, Dec. 28

Water Colors and prints have been the usual offerings in the galleries during the last fortnight, and there is little else announced to enliven the next two weeks. The Duveen Galleries have promised New York a formal presentation in February of "Pinkie," the famous canvas of Sir Thomas Lawrence that recently fetched such a staggering total in London. The affair will serve to give a filipt on art season that stands in need of something swagger and outstanding. The Alphonse Kann Collection is to be placed on view at the American a Transport of the exhibition. A commanding bust of be placed on view at the American a bronze Victory, somewhat in the handsomely illustrated catalogues promise a fine treat when all the session that stands are considered to commemorate a chamble to commemorate a chamble to be placed or vival and the session that stands when all the session that the handsomely illustrated catalogues promise a fine treat when all the session that stands are considered to commemorate a chamble comment to comment to comment to comment to comment to comment ing the second half of the century, with its period revivals and general hideosities of indiscriminate collecting. The last two parts of the gallery are devoted to the William Mortage and the second lery are devoted to the William Morris or reform movement, roughly
called Medievalism, and the period
of "Naturalism," with the strong effect of the French "art nouveau."
Joseph Breck has made a splendid
beginning with these six period
groups, and it is expected that the
various collections will be more
completely developed with time.

Arliss' Biography

Under the title of "Up the Years From Bloomsbury," George Arliss has written his blography The first installment appears in the January issue of the Ladies' Home Journal. These early chapters reveal a persuasive power of writing which indicates that the library as well as the 'stage might have claimed George Arliss. The subtle humor and the sense of the comedy of life that are quadries of Arliss, the actor, are present in Arliss the writer. Here is the unexpected turn of thought, pat, pertinent; the sity, quiet fibe, the rapier thrust."

Save for a brief period when the London bus and the English church captured the imagination of a had not yet 10, Arliss naver had a doubt about the profession to which he about the profession to which he should devote his life. He tells of his first pantomime, his first ap-pearance in home theatricals, his inal breaking down the barriers and entering the professional stage as an "extra gentleman" in a as an extra gentleman in a suburban London stock theater; of his real which led him to enlarge on the roles of a silent "super" to the dismay of his fellow-players; and while this is proceeding he sketches here and there portraits of the people about him with a deft-ness that, miniature pen pictures as they are, they foreshadow the characterizations of the famous men and women who later came into

"The Nightingale," the new Jenny Lind operetta, began a week's engagement in Newark, N. J., Monday night with three important cast changes, as follows: Eleanor Painter is now starring in the title rôle of the play; Tom Wise, playing the rôle of P. T. Barnum, became one of

Music News and Reviews

Ruth Breton Plays With

Philadelphia Orchestra PHILADELPHIA, Dec. 24 (Special Correspondence)-Last week's concerts of the Philadelphia Orchestra presented Ruth Breton, young American violinist, as soloist, with the Fifth Symphony of Beethoven as the orchestral feature. Mr. Stokowski led the symphony and Dr. Rodsinski the overture and the accompaniment for Miss Breton.

The program opened with a sprightly reading of Smetana's Overture to "The Bartered Bride." Dr. Rodzinski brought out the clever humor of the music and at the same time missed nothing of the compli-

time missed nothing of the compli-cated and elaborate construction The assistant conductor also pro-rided a fine accompaniment to Miss The violinist played the Goldmark

The violinist played the Goldmark Concerto in A minor, a work of great length and chiefly remarkable for its effective scoring, for the construction is exceedingly loose and the musical material noteworthy only in a few passages. It demands a fluent technique and an unusually facile bow arm, Miss Breton met the difficulties easily and in addition displayed a virile tone and an intonation virtually perfect, Her left-hand work is especially good, as was shown in the difficult closing movement and in the elaborate cadenza. She was received with great enthusiasin.

aiam.

Air. Stokowski was received with great applicate when he appeared atter the intermission to conduct the simphony. The first movement has been played by the leader of the numbers far more affectively than this concert and the tempo of the slow movement segmed to be too deflorate. The Scherzo and the last movement were admirably played.

Chicago Symphony and

Opera Performances CHICAGO, Dec. 25—Music at once attractive and brilliant made up the regram which was offered by the Chicago Symphony Orchestra, Dec. 24. Appropriately enough, Mr. Stock Included in his scheme of art the sulte arranged by Rimsky-Korsakoff from his opera, "Christmas Eve." Whatever may be the merits of this composition as an example of dramaturgy—and there is some reason for the belief that it is more peculiar than convincing—the music is unfountedly attractive. The masterly grasp of orchestral effect which was one of the distinguishing features of Rimsky-Korsakoff's writing also was Rimsky-Korsakoff's writing also was the possession of Alexander Glazoubrought the program to a close. In this Russian music, as well as in Strauss' "Don Juan," the orchestra brought about extraordinary feats of rirtuosity.

The solo artist of the occasi

was Miss Rae Bernstein, a youthful pianist who, in a concerto by Bortkiewicz, disclosed remarkable ability. The not inconsiderable difficul-ties of the composition were surmounted with the insouclant ease that comes only to those performers who have added untiring work to natural gifts. But there were, hap-

pily, other qualities in Miss Bernstein's playing than technical brilliance alone. She has been taught the secret of tone production that is large without being hard; she has learned, too, the beauties of an imaginative style. So excellent a talent should be heard again. The concerto itself proved to be interesting in a Tchaikovskyan fashion, effectively written for the solo instrument and scored in the picturesque style of Russian art.

At the opera, the first performances of the week were Verdi's "Otello" (Dec. 21) and d'Albert's "Teffand" (Dec. 23). The latter sirready has been discussed in these columns. "Otello" was given an interpretation of glowing power and beauty. Charles Marshall brought to his reading of the Moor a more subtle comprehension of characterization than he has disclosed in any other role in which he has appeared here. Nor did he fail to bring his vocalism up to the standard of his acting. Luigi Montesanto was the lago of the cast and made a notable impression in the part. Not offen has this music been sung with so much sonority. In the music of Desdemons, Miss Eleanor Sawyer appeared for the first time this season. Her apparent lack of ease evidently did not permit her to de full justice to her own abilities or to Verdi's work, and there were moments in which it led her to sing with faulty intonation.

La Périchole Given at Jolson's, New York**

"La Périchole** Given at Jolson's production for passing to opera of recitative and aria. The path for him to follow is that structure

stage from the standpoint of speak-ing. He is a great talking actor; a comic master in a scene like that of NEW YORK, Dec. 27—Offenbach's La Périchole," presented at Joison's heater. New York, by the French "La Périchole," presented at Jolson's must make their thrust and sting felt again. Mr. Servatius is not of the Opéra-Comique company, under the musical direction of Julien Clémandh; evening of Dec. 27, 1926. The protagonist for Aristophanes.

An exhibition of 30 works of sculpture by Paul Manship will be opened at the Museum of Fine Aris, Boston, Jan. 5, in Renaissance Court, and continue for some weeks.

"When Icicles Hang by the Wall"

A NOBLE essay is this that I have just been reading, James Russell Lowell's "A Good Word for Winter." In friendliness and humor it goes beyond Charles Lamb; in trenchancy and good sense and the suggestion it gives of inexhaustible resources, it is equal to Hazlitt treatise. The sonnet may and freenough. This essay makes me feel like paraphrasing Stevenson and that although we are mighty ellows nowadays we cannot like Lowell. Estimating roughly, I should say that it would take about a dozen of us to make one of him. After you have found for me, anywhere you like in the world's literature, a piece of writing which is at one and the same time more witty, robust, and sound than this, en I shall be willing for you to say what you like about the chilly primness of the Yankee. But until you do find such a thing, read "A Good Word for Winter" at least once a year and he thankful that it exists.

The wit of these twenty pages would outfit a contemporary essayist for his entire career, and the learning would utterly swamp him; but these things we take for granted because they are Lowell, and Lowell is a classic. What most amazes me every time I go back to the essay is the breadth, the drive, the amplitude, the running on and on as though the horizon was the only limit, the manly force that breathes in every line and word of it. You will not find a sleepy sentence in it from end to end. And then the versatility! One man among us today can write creditably about books, and another man can bring efore you the very look and feeling fields and forest; but who can weave back and forth as Lowell does from open air to library until we can scarcely tell which is which? Who has as keen an eye and as sure a judgment indoors as out, outdoors as in? This "Good Word for Winter" was written down, I suppose, in the library at Elmwood, but I know that it was thought out on the snowy hills turning to his desk and taking up the

me one of the marks of Lowell at his gether the remainder in a composibest, that he likes to do two widely tion all harmonious. During these sundered things at once. He mixes months, in which I have hardly had books with the landscape more time to think of the summer's wan-subtly than any other writer that I derings, memory and imagination

ible resources, it is equal to Hazlitt at his best. Only one other man that I know of could have come anywhere near writing it, and that is Leigh Hunt—but he did not know enough. This essay makes me feet a thousand times as long, must be fragmentary because its main business is to waken reverberations.
For these reasons I feel justified

in adding to Lowell's essay, as a footnote, one thing that he left out. time of the year for this and that excellent reason, but he does not say that it is the time in which spring and summer and autumn are to be most fully enjoyed. That is what I wish to add to his list of winter's charms, I intend no disrespect to springtime, of which I have a high opinion, in saying, quite soberly, that it is most enjoyable in retrospect and anticipation. Autumn, too much as we may delight in its glories when they hang displayed be fore the eye, is most beautiful when gathered into the barns of memory.
And as for summer, concerning which you may harbor a doubt, tha to me is the clearest instance of all Spring is beauty's seedtime, sum mer ripens it, and autumn brings it enjoyment of all that tribute which it draws like a king from the rounded year.

We do not know what wealth the seasons have brought us until we count them over in the meditative firelight of the shortened days, and therefore a year without a winter-I knew five such years in successio once long ago, and do not care to see another—is one long preparation for a climax ultimately denied. What do they know of summer who only summer know? + + +

Sitting here at midnight by my

Connecticut fireside, I have been walking again the English lanes that I walked six months ago, seeing the of Watertown and along the ice-bound marshes of the Charles. It is bookish enough for any taste, but it is not pedantic. You would never guess, unless you knew, that its author had ever sat in a professor's to the mediev of hells that floats. had ever sat in a professor's to the medley of bells that floats of chair. It is the work of a man who loves books and knows them, but White Horse, Revery you may call it who loves boisterous weather too if you like, but it is a revery the and hails the oncoming frost like a most vivid imaginable. Those lanes brother. I fancy that on the day when these pages were written late December than they were in whether to sit by the fire and read Montaigne or to take his skates out of recollection has made them all my to the frozen plains of the Charles own and as it were a part of me.
—and so he "split the difference" by Whatever was meaningless or discordant in the first experience has dropped away during the six mor Now, I think of it, this seems to that intervene, and I have pieced tohave been actively at work in their dark laboratory, sifting and sorting impressions, rejecting this, enhanc-ing that, and laying upon the whole the hues of distance and enchant-ment. I seem to see the whole sum-mer now in an instant, as one may see a wide landscape in a single glance of the eye.

> Rockford! The Valley of the Lyn! Sheep and ever more sheep on all which have been brought to light in scape so beautifully painted as this the hills, and above them on the the deciphering of ancient manuwas. It was like the richest imagirs the groups of wild black horses! I hear the night-long and the door, and see the beeches leaning out across the sun-bright pools. Bracken waist-high is waving in the brighten the water-reaches. Incredafter my week of tossing on the gray monotone of the ocean. Very kindly are these Devon faces. I am walking up Lyn water, I cross the divide, dip into John Ridd's valley and climb again to the sight of Bristol Channel and the long blue line of the Welsh mountains, and then go down the headlong slope of Porlock Hill—do you see the little town clusas though made of children's blocks!

loved by Southey and Coleridge. Is there a better inn anywhere than the Ship Inn at Porlock? I the towns of Navan and Kells, While think not. Has anyone ever had a he was inspecting horses, for which better dinner than I ate there after that county is famous, a sound in my eighteen miles of steady going the sky caused him, and all the peoover the hills of Exmoor? I consider it improbable. Has anyone ever had a more joyous and rollicking and generally triumphant day than that Porlock and back again? I believe it silent wonder at the phenomenon to be impossible. I verily do. If there was any imperfection in that day, any tiny detail which at the time I appeared now like the little clouds overhead that raveled away into the blue. And do you know that Porlock church has one of the oddest spires in the world? Do you know that a man thinks better of his eyes forever after when once they have been blessed with the sight of Bristol Channel from Culbone Hill? Are you aware that the tiniest Exmoor brook, from ten miles away shining in a ing silver wire? No? Then you must go and see these things. "To read the book of nature," as Paracelsus very brilliantly said, "a man must walk over the leaves."

Snowflakes are tapping softly at my window. The night is very still, asleep in its blanket of snow. The cooling embers click on the hearth, cooling embers click on the hearth, and I hear the faint flapping of a little flame. Winter, and especially a winter night, is the time for remen

An Airplane Legend

Some of the most thrilling results desert, I never saw an autumnal landwhich have been brought to light in scape so beautifully painted as this scripts in the various libraries of nable spread over an uneven surface; Europe, Great Britain, and Ireland no damask nor velvet, nor Tyrian dye are those which contain romantic of stuffs, nor the work of any loom, stories which indicate a foreshadow- could ever match it. ing of discoveries which we look There was the incredibly bright upon as altogether the result of material developments pertaining to the dish brown of the Bayberry, mingled

present era.

One of the most curious of these one of the most curious of these is the tale of the appearance of an airplane, the account of which was written between the years 944 and Plum, the yellowish green of the written between the years 944 and 956 A.D., during the reign of an Irish king named Congalach. The authenticity of the date of the manuscript is beyond question, and the descrip-tion is as follows:

Congalach reigned in Meath-and was evidently given to farming pursuits, for the story goes on to tell of his one day attending a fair at a place now called Telltown, on the Meath Blackwater, midway between ple, to look up, and they beheld a large ship floating far above them. It appeared to be fully equipped with a numerous, and evidently intelligent crew. After a time, during which the people in the fair gazed in the huge vessel gradually floated toward some clouds into which it entered, and the awe-struck crowds saw it no more. This same story is told with slight variations by the Norse landscape consisted in the lowness locuments, named Kongs Skuggio.

Yet another tale is told in one of less than in the brightness of the these Irish legends, in which the tints. It was like a thick writer prophesies that a time will will run through the streets of Jeru-

These stories are, of course, mere legends of imagination, but it is in-but no doubt the dust would fly in teresting to find them noted in docu-that case, for not a little had accumuteresting to find them noted in documents of undoubted antiquity, and in lated underneath it. Was it not such an autumnal landscape as this which suggested our high-colored rugs and thoughts of people in the tenth.

It would be interesting to understand the mental capacities, and the outlook of the persons who insuled such tales:

outlook of the persons who inspired berry; there the shrub-oak patches such tales; and who thought them and the bayberries, there the maples

worsted or a fleece, and it looked as

or rather the tasseled fringe which

it, though it needed not to be shaken

And then there was Burford in the Cotswolds, and Bibury-in-the-Wold. But really, this footnote will soon grow into an independent essay if I begin to talk about those towns, and I have no intention of writing one. I have merely wished to say one more good word for winter and to suggest how pleasantly we may fleet the time on a winter's night fleet the time on a winter's night fleet.

Sweeter to me than the salt sea spray, the fragrance of summer rains; Nearer my heart than these mighty hills are the wind-swept Kansas plains; Dearer the sight of a shy, wild rose by the roadside's dusty way Than all the splendor of poppy fields ablaze in the sun of May. Gay as the bold poinsettia is, and the burden of pepper trees, The sunflower, tawny and gold and brown, is richer to me than these. And rising ever above the song of the hoarse, insistent sea, Calling me.

Our Friend the Chair-Maker

Before sunset, having already seen way across the desert to the eastern edge of the desert, we overlooked the north, and protects it, in some measure, from the invading sand. Notwithstanding the universal bar-

sistants. What he does not know alw about form and polish and style is mosphere of High Wycombe, and numberless illustrations of chairs which he takes out of a faded portfolio, have all helped to make him an expert in the art of chair-mak-ing. It must not be supposed that with the bright and living green of makes anything new. Everything he fashions is old before he has fin Shrub-Oaks, and the various golden and yellow and fawn-colored tints of pendale chairs which look as if a hundred and fifty years of wear had Birch and Maple and Aspen mellowed their bright polish into a each making its own figure, and, in tawny richness was made only last the midst, a few yellow sand-slides on the sides of the hills looked like week in his factory. His practiced eye chose the seasoned timber, his deft assistants carved those clawthe white floor seen through rents in the rug. Coming from the country shaped feet, his expert knowledge laid that "antique" polish. There, in the corner is a bunch of small as I had seen, this was perhaps the most novel and remarkable sight that I saw on the Cape. Probably the brightness of the tints was enhanced chains made into a flail, with which the sharp corners are beaten down, by contrast with the sand which surhalf centuries completed in ten min-

God's Plan for Man

Written for The Christian Science Monitor

THE Bible teaches that God's as the Bible teaches. God is man's plan for man includes good only. From this it follows that man, whom God creates, is good, and unlimited intelligence, since God is God's plan for him. Because the real universe, including man.

unceasingly to prove this, by letting his life be the unfolding of God's plan for him. He did this by keeping himself free from belief in sin, disease, and death, and by overcoming these evils for others; and he taught unmistakably that everyone may learn how to destroy in his experience whatever is unlike God, good

Centuries passed ere the ingratitude, envy, and hate which attempted to destroy Christ Jesus were sufficiently overcome for his glorious life to be understood. Mrs. Eddy's appreciation of him and his healing work, her love for God and man, and her pity for suffering humanity, cleared her way to search the Bible until she discovered the definite rules which Christ Jesus applied to remove sin, are removed by the understanding sickness, and death. She learned that the real man is created to serve these rules are the truth about God good only, that man's true selfhood and man, which may be scientifically applied and proved by everyone who seeks sufficiently to understand and pass from God to man. Christian Science teaches that sin

and sickness are the manifestation of removed, a fact which gives assurerroneous beliefs. "Remove error from ance that everyone may enjoy the thought, and it will not appear in some divine privilege. Beliefs of sin effect," is a rule given in "Science and and disease apparently obstruct God's Health with Key to the Scriptures" (p. 40) by Mrs. Eddy. And on page 234 she writes: "Sin and disease must be thought before they can be manifested. You must control evil thoughts in the first instance, or they will control you in the second." Obedience to Christianly scientific rules removes obstructive beliefs, and allows humanity to move Godward.

Since God is the only cause, and creator, and all good, disease has neither cause nor creator. Disease is error. It is sin and faith in disease which are to be removed by the understanding that man is perfect and spiritual, wholly separate from error or any belief of error; that he is at-one with God, "being enriched in every thing to all bountifulness,"

The "Scottish Vandyke"

I cannot help feeling surprised that a time teeming with the elements of over two hundred factories or work- survivors of a superior race. They strife and commotion should have shops in the town, and carts and lorries piled high with chairs of every conceivable shape and size may be seen trundling along the London road six days out of the seven.

Survivors of a superior race.

Including along the with machine-made article much produced an artist of such merit as George Jamesone. Of this painter, distinguished by the name of the Scottish Vandyke, less is known than seven. Seven.

Our friend the chair-maker has work for themselves, others do not an architect, and was born in Abermachinery and smoking chimneys. In a long wooden loft which may at one time have been a granary he are privileged beings, living some
Scotland in 1628; and commenced his works away, with one or two as-sistants. What he does not know always surrounded by the æsthetic His earliest works are chiefly painted probably not worth knowing. Years of practice, the chair-making at-mosphere of High Wycombe chairmosphere of High Wycombe chairmaking.

His earliest works are chiefly painted on panel; he afterwards used fine linen cloth. Having made some successful attempts in landscape and history he relinquished them for por-traiture—a branch of the art which this island has never failed to patron ize. He acquired some fame in his day, and was considered, after Vandyke, the ablest of the scholars of Rubens. His excellence consists in softness and delicacy, and in a manner broad and transparent. His col ouring is beautiful; his shades not changed, but helped by varnish; and pencil.

When Charles visited Scotland in 1633, he sat for his portrait to Jame-sone, and rewarded him with a diamond ring from his own finger. Many of his portraits are still to be found (in 1879) in the houses of the Scot-

In the genealogy of the House of Breadalbane occurs the following singular memorandum. It is dated

"Sir Colin Campbell, eighth laird of Glenorchy, gave unto George Jamesone, painter in Edinburgh, for Robert and David Bruces, kings of Scotland, and Charles the First, king queen, and for nine more of the queens of Scotland, their portraits, which are now in the hall of Ballock (now Taymouth), the sum of two hundred and threescore pounds. Moreover the said Sir Colin the knight of Locnore's lady, and the portrait, which are set up in the hundred and fourscore pounds." . . dom of posture and magical colour-ing of Vandykes and Reynoldses, it is no wonder their fame

great . . .

brings forth fruit, and the fruit must be in speech and in act.—Loan Court-NEY or PENWITH, in "Cornish

divine Mind, the only creator of the Jesus lived in obedience to God and this gave him his authority and

power. He said, "As I hear, I judge: and my judgment is just." If one who believes in disease will turn his attention away from a so-called material body to his mental condition. refuse to think about disease, understand that thoughts of disease have neither source nor manifestation except as delusion, and remain patiently attentive to divine Mind, then good, true ideas from God will come to him. Proportionably as this is done, the delusion of disease is removed, and one's life progresses in God's way, naturally and joyously.

Christian Science reveals the necessity of removing sinful as well as diseased beliefs, because sin tends to disease. Jesus taught this when he said to the man whom he had previously healed, "Sin no more, lest a worse thing come unto thee." Divine Love removes hate and fear; the understanding of purity removes lust; sire to think and to talk about disease is healthy and sinless, and that he has no desires except those which

From many thousands of human lives, sin and disease are being plan for man; but with the removal of the false by the true, health and holiness appear. Gratitude is a marvelous weapon in the removal. Willingness to work and persistence to win are also needed; and much patience and grace are necessary. But the process of removal need not always be prolonged. Fully to grasp God's goodness and man's perfection brings healing instantly. Such healing is aptly described by the following lines which Mrs. Eddy quotes in "Miscellaneous Writings" (p. 51):

When from the lips of Truth one mighty breath Shall, like a whirlwind, scatter in

Then shall the reign of Mind commence on earth.

And starting fresh, as from a second Man in the sunshine of the world's

The whole dark pile of human me

new spring, Shall walk transparent like some

the door open.

LISTER GRAY and his sis- | and Karel Howard came running to ters, Hazel and Robin, were hiding in their garden play-house to watch the birds outside, when there came a soft knock outside, when the cam

"Shouldn't wonder if that's Brian and they all stood staring. Across Lutes come to tell us that he has thought of another place to look for a white owl," whispered Alister. "He has thought of nothing but white owls since the Natural History Society offered \$25 for a living speci-

"Or maybe he has hit on another scheme for getting Verne Kilbourne into our Junior Naturalists' Club," suggested Hazel, "But I don't think made entirely of that substance with it will be a bit of use. He seems to made entirely of that substance with

the will be a bit of use. He seems to made entirely of that substance with the decided not to have anything to do with us."

The visitor at the door proved to be, not Brian Lutes but little Star Kilbourne, sister of the boy who had refused to join the club. The Kilbourne had lately moved into a new might have been taken at first glance for a living bird.

"Hello," exclaimed Alister, "so our house of for roll with the street and house a few rods down the street and snow sculptor has been at work down Verne had entered high school. Everyhere? Was this the big white owl you body was inclined to like him but thought you saw, Karel I don't won for some reason he had what Alister der he fooled you." Gray called "standoffish" ways. He "No, no," protested Karel. "I did not only refused to join the Junior see a white owl, a live one, fly into Naturalists but he kept away from the boys as if he were not the least dinterested in anything they did. They could not find out how he spent his

Star's News

Star had her finger on her lip as he stood as tall as this snow image she stepped softly inside. "There's a strange bird in your maple tree," she whispered. "He looks all gold when he flies in the sunshine. You "Not much, except to the standard of the standard can see him if you don't make a

They all moved quietly to the one window of the garden house. There was a feeding station in the shrubbery just outside, and four bluejays study snow scenery. But it's queer on the ground were picking up corn he should be down here doing such so busily that they looked like four jobs as this. You'd think a real artist whirling pools of blue on the snow. The Grays were quite used to such sights, but little Star's eyes grew wider and wider as she ward. she pointed up into a maple tree where a handsome evening grosbeak was fidgeting about. His hues of yellow, white and black were rather dim in the shadow, but when he flashed across a sunlit open space there was some truth in the description "all gold."

It will was are so small the littlest kid couldn't crawl through, grumbled Brian. "I call it pretty grumbled Brian. "I call it pretty stupid of that fellow to put his mas-

First evening grosbeak we've seen this year and he is early, too," commented Alister. "Let's go out and see if we can find the rest of the flock; there ought to be a dozen, anyway."

Star went with them, her face full for a kind of 'keep out' sign. But the

of delight. When, far down a wind-ing walk in the shrubbery of the big ing walk in the shrubbery of the big garden, they found 8 or 10 more golden birds, she sighed happily. "Those birds will be around here all winter," Alister told her. "Slip

through into our garden any time you want to look at them. See here, little girl, if you are interested in birds you can join the club and go bird-spying with us up on the moun-

Star? We have all urged him as hard as we dare. Lately, he just keeps

away from us as if he were offended."
"Oh, no, he isn't like that. But he thinks bird study is silly and stupid and he says he can't afford to spend his time running around the way you do because he has something better to amuse him. Well, I don't think it's silly a bit—I think it's thrilling. There, I hear Mother call-

She ran away in answer to that voice from the new house down the street beyond the big garden. The three Grays followed the flock of grosbeaks which had gone deeper into a garden jungle. Chickadees strummed overhead and a goldfinch in soher winter clothes dropped a few soft notes from an elder tree.

At a turn of the path they stood still to gaze with astonishment at something in a narrow open space. in snow and lying on the top of a explained Verne. "I could make a hard snow pedestal that looked like lion and cat and so on from pictures

work.

Who under the sun has been out so many things about birds that if you should ask me again to join here?" muttered Alister. "Didn't that club of yours, maybe I would. tools in front of him or else not know we had a snow sculptor like I've always thought it was more fun that around this neighborhood. Some-body must have worked for days to than to poke around in the woods. body must have worked for days to make that. He could, you know, without our seeing him. I don't believe we have been down in this part of

the garden for a fortnight at least." can make a whole menagerie all by
They found a well-trodden path through the deep snow to the stone wall between the garden and an old orchard. But beyond the wall there was such a network of snowshoe and ski trails that they could not trace out any particular one. So they went along the wall to the street that are along the wall to the street that ran past the east side of the garden.

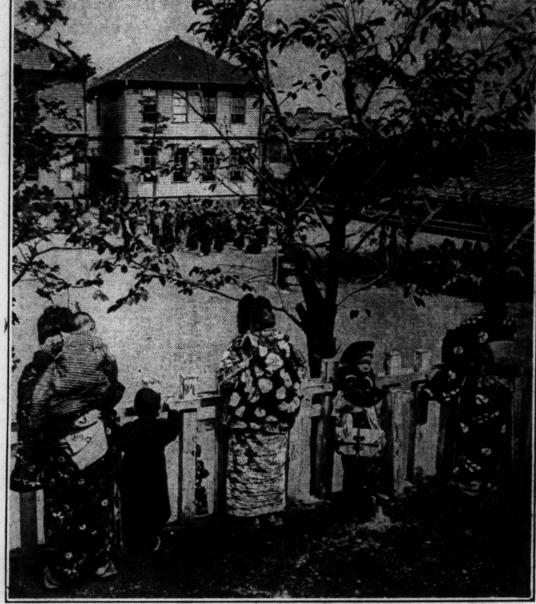

There they were pounced upon by Brian Lutes, who had been looking

Get your skis, Alister—and you girls can come along, too. Karel Howard thinks he has seen a white owl over on the island. A dozen of the club members have gone and we're going to have a picnic luncheon at the cabin while we watch. We'll show that high-headed Verne Kilbonyan that of fun by not joining."

"How can you show him when he won't be there?" asked Alister. "I don't think the fellow is high-headed, either. I can't make out what he is. Never mind, old man, we'll be with you in three minutes."

A short cut took them through the orchard to the river which flowed to the west of the little town. The island was easily reached on the ice and they went up through the bushes to a clearing where an old log cabin stood. It was not exactly the prop-erty of the Junior Naturalists, but they used it when they liked. The bushes were full of club members

The Friendly Squirrel

NE busy Saturday morning as I stood at my phone near the windows of our stairway landing, I was attracted by the antics of a fat little squirrel sitting on the limb of a tree near by. He seemed in such a happy frame of mind, shaking himself, whisking his fluffy little tail this way and that and reveling in the glorious warm

Rather cautiously I raised the window whereupon he gave me a saucy little look but showed no intention of leaving. I descended to the pantry where I found a basket of nuts and hastened back with one for my newly-found friend.

A short time later I heard a noise at the windows above the old piano which stands in our hall, and, look-ing up, I saw Mr. Squirrel watching me intently. Out upon the porch I went with another titbit and clucked softly to call him. Down upon the porch he scampered and took the proffered delicacy, not even moving when the postman came with the morning mail. I closed the door then, and sat down to enjoy the letters to he accompaniment of a little scratch, scratch" at the door. I finally opened it to my new little begging animal friend. Later that day when our sister and

brother came for a visit, Mr. Squircame, standing now and then on his hind feet as if to scan this new domain and get his bearings. It did not take much coaxing before he was policy is to make the best of those climbing up upon our chairs and opportunities in the way of govern-even into our laps. One big nut he ment that they already possess. again and again offered him this discarded nut, he promptly rejected it, and at our last offer, dropped it upon the floor, where it rolled far from reach. A week passed to the day before he

again came scratching at our door. He walked about the house fear-

I saw him but one Saturday more before he discontinued these visits, but on other days I sometimes find him stretched comfortably along the limb of the big poplar near our bed-room window from which I some-times talk to him. But he just looks lazily at me as if to say, "I'm just so very content right here, I don't believe I'll come a-visiting today, if you'll excuse me."

India and the Philippines N INDIA and the Philippines the

British and American governments are faced with somewha similar problems. Great Britain in India and the United States in the Philippines are ruling over alien peo-ples who sometimes appear to be loudly clamoring for self-government

and release from a foreign yoke.

Are these people capable of self-government? That is the question. The generally accepted answer seem to be that they are not at present, but that there is no reason why they should not become so, if they are willing to take the necessary steps. It is an interesting and significant fact that in both countries a step forward in this path leading to self-

government has recently been taken.

India has just been through the throes of a general election, and the Swarajist Party, who have for some years now stood in the way of real progress in India, refusing to work with the Government, and wrecking and obstructing its policy wherever possible, have lost so many seats, both in the Central Legislative Assembly at the capital and in the local councils of the provinces, that except in Bengal and Madras they rel appeared at the living-room win- are in a decided minority. them. He says that while in the early days of American control the Philipout to bury it, but always returning pines may have presented a military and economic development. He there-fore proposes that some immediate changes be made in this respect.

Thus both for India and the Philip pines there is progress—the sort of progress that, while it may seem slow to some, should prove both true and enduring.

Nobel Peace Prizes

It is a wonderful sign of the progress that has been made in healing no legs?

that the names of a Frenchman and a German should be found side by side in the awarding of the Nobe Peace Prize for 1925. This pri has been divided between Aristic Briand, Foreign Minister of Fr. and Dr. Gustav Stresemann, For

Minister of Germany.

The 1926 prize has also been divided—this time between an Englishman and an American. It goes
to Sir Austen Chamberlain, England's Foreign Minister, and to Gen Charles G. Dawes, Vice-President of

the United States. The three European statesmen were all chosen because of their work in connection with the Lo-carno treaties—so great an effort toward wisdom and peace that the word "Locarno" has come to stand for an atmosphere of conciliation. Vice-President Dawes was honored because of the famous Dawes Plan which did so much to help German

The Nobel prizes were founded by Alfred B. Nobel of Sweden, who was also the inventor of dynamite. They are given to those who have worked for the benefit of humanity, and are awarded under five headschemistry, medicine, literature and

Turkish Women at School

Turkish women are to be com-pelled to attend school. This is the news from Turkey where the Gov-ernment is doing all it can to introduce modern ideas into a backward country. Public schools for women are to be opened throughout the country, and these the Turkish women must attend in order to receive the elements of an education. It is said that this order will a compel thousands of the nor women of the eastern provinces to attend school.

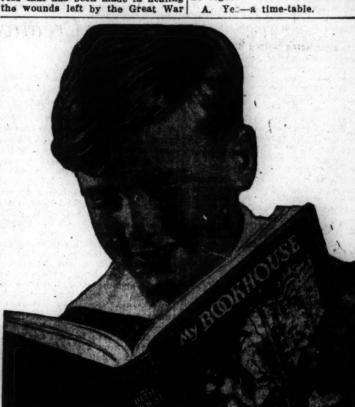

At the same time the Government is establishing women's clubs in its effort to introduce modern ideas, among them the wearing of hats instead of veils.

Two Girls' Names

We have purposely omitted the first two letters of each of the five words. You have to supply these two letters in each instance, and rather those of civil administration have at the same time the name of and economic development. He therevertical column. Can you do it? The first girl's name begins with "L."

"The Child Who Reads Is the Child Who Leads"

Benjamin Franklin, Abraham Lincoln, Daniel Webster-the list of those who have attributed their success to the influence of books that they read in childhood, would read like a roll of the world's

Give your child the advantage of reading! Stimulate in him the desire to read! At the same time, be sure he has right reading,

standard which children will enjoy and which will strengthen and build character. It gives children the very best stories and poems obtainable, selected from a wide range of sources by one who is "a writer, an educator and herself a mother," and so graded that every child will find just what he needs at each step of his progress.

The Three Tests of Right Reading

In making her selection, Olive Beaupré Miller, the editor, subjected every story and poem to these three tests: 1. Has it literary merit? 2. Will a interest the child? 3. Will what it adds to the child's life be for his good? Does it present sound standards, is its spirit fine, its atsmosphere helpful?

My BOOKHOUSE is now used in a hundred thousand homes. It provides children with reading which will give real ideas and ideals, enlarge their interests, their understanding of human nature and their perception of beauty. Six volumes, 2688 pages, most of them illustrated in colora.

EDUCATIONAL

The course of the Home Study Class is adapted to all ages and enrols pupils as young as 12 years of age, while its oldest student is 80. The average age is 40. Students are enrolled from Paris, France, to California, and from Canada to New Mexico. Many students enroll to develop their power to appreciate art, others Vision, Talent, Progress, for Him

THE ability to draw and to paint can be made as available as the famous three R's of the primary school, in the view of Anson K.

Instruction is confined to advice as to the subject and the time to be spent upon it, and the proper use of the tests to be applied by the students. Cross, artist and teacher, who is As true vision is gained in this carrying into effect his methods at manner, individual technique develops. If at fault, students find their

earn to read accurately and to write needed work they may gain profesegibly, he can learn to draw and sional power in drawing and paintenant, says Mr. Cross, who has ing without restraint as to theories. ped the talents of many appar-untalented students through

The popular drawing which Mr. Cross foresees does not, however, imperil the position of the artist; it toes not mean that there will be too many artists—a misguided criticism which he says has been directed against his system. Learning to read does not mean that one will be an orator like Bryan; learning to write oes not mean that one will be a learning to draw mean one will be an artist like Sargent. Rather, it will increase appreciation for the works of the artist, and spread more abundantly the artist's joy in beauty and in life and living.

Months Instead of Years

To make competent drawing possible to the unskilled in the way which he has visualized. Mr. Cross has developed a method of teaching which, through its training of true vision, accomplishes in months what formerly consumed years. While he has a comparatively small group of students under his personal supervision at the Museum of Fine Arts, he devotes his major interest to his

original home study course,
"The accepted belief that there
must be special ability for one to draw at all is due to the failure of art instruction to offer artistic methods and sure tests for training the vi-sion," Mr. Cross explained to a representative of The Christian Science Monitor. "Usually students depend upon a teacher's corrections if not upon his hands, and the most talented must study a score of years to gain the vision that might be acquired in months, if instead of relying upon their teacher's eyes, students were forced to rely upon their own eyes, aided by tests that reveal all mis-

The means which Mr. Cross employs to enable the student to recognize his own mistakes and to correct them is a drawing and painting glass which, after a free-hand sketch truthfulness of the drawing can be minutely tested in comparison with

This device consists of a piece of elear window glass set in a frame holding a spirit level and two lenses. It is used in place of paper. Sketches are drawn upon the clear glass, a white slide being behind it. The pupil draws with a special crayon without detected and the pupil instructs himself by correcting his own vision. It
is thus found that power to execute
develops with the power to see accurately; and, drawing by true vision, Mr. Cross finds, can supplant
drawing by rule and precept.

Denied the encouragement or even
approval of his elders, the child who
approval of his e

Equal Opportunity "Thus training," Mr. Cross added, "the home student gains as rapidly as the student who has personal instruction, for he does originally work from nature instead of the customary from nature instead of the customary copies, and the glass instantly reveals all mistakes. There is still much hard work, but an hour is more profitable than a day by usual methods. Anyone who will follow the course for half an hour or more daily will learn to draw and paint from nature as rapidly as he masters other studies, and one with artistic ability will draw and paint with a freedom that will prove this method to be the most artistic of all. No method can make art easy or multiply artists, for genius is beyond the schools, and art demands of genius a life of consecrated effort."

The same theory which un lerlies the Cross system of true-vision drawing—the theory of/self-correction by comparing the sketch with the

form shall take the lead of idea, is to reverse the process by which the creative instinct works.

That children should recite poetry has always been accepted as an in-evitable part of their education; that they should compose real poetry an almost unheard-of feat of intellithe Cross system of true-vision drawing—the theory of self-correction by comparing the sketch with the object through the testing glass—applies to his instruction in painting. In drawing, the three-dimensional object is brought to a plane surface of vision by viewing it through the glass. Self-correction in painting is secured by means of the two lenses which blur the details away, and show only the masses that are most important in the effect. One lens shows the subject and the other the object. The comparison is not between the flat painting and the round object, but between the blurred images on the plane of the lenses.

"This method has proved that theory does more harm than good to the student who has not gained much power to see," Mr. Cross explained further. "Therefore, vision-training sketches take the place of theories. During the first year the teacher refuses to draw for students or before them or to tell them what changes to

chool.

Just as surely as a student can and if they are willing to do the mediums or technique.

Based on Experience

broad experience in art instruction jority of them had either no previous joy and happiness but to their ability training or comparatively little.

their power to appreciate art, others because they cannot afford to attend art schools. Art teachers are en-rolled, also illustrators, architects, artists and art school graduates who wish to perfect their vision by this

Additional to the increased appreciation for the works of art and the inherent joy of the artist which draw-ing and painting bring to a person, Mr. Cross considers these subjects of Convinced that the ability to draw and paint is as general as the ability Mr. Cross's conviction that, as he to read and write, he believes tha puts it, "desire to paint is proof of drawing and painting should be simithe ability to paint" is based upon a larly a part of all juvenile education, since they inspire the perceptive, reacovering fully 40 years, during which has been associated with the Normal Art School in Boston and more lately with the Museum of Fine Arts. Thousands of students have come to students his supervision and the add not only to their setheric. under his supervision and the ma- and to add not only to their æsthetic

Monitor

Every

Saturday

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are put regularly in the above form on the Thursday Educational Page. The purpose of these questions is: To assist in a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in secondary schools and colleges; frequently one for the upper elementary

as dramatic art, scene painting and an occasional banquet, with white linen and flowers, have found their way into the workers' education classes. Public lectures given by men and women of note from New York, Chicago and abroad supplement work in the classes and help to spread the educational influence

to the community at large.

Tom Tippett, who organized the classes for the United Mine Workers of America, sub-district five, has worked out his methods of teaching adults step by step, with not too much regard for the theories of edu-cation he held when he left rewspaper reporting to go to undertake the job over two years ago. "I go around feeling very humble," he said when interviewed. "These people have a great deal to give. They have a background of experience of young learners. Of course, not all of them are brilliant, but I have found that even those that seem dull have something in them if you dig deep enough."

To Retter Industrial Conditions The object of this educational experiment, for which the first annual appropriation was voted in July, 1925, by the sub-district of the miners' union, was stated as expressly "to provide timber for the Labor movement." The aim was to give the workers a course which should spur them on "to take an active part in the movement to better industrial conditions." The area chosen for the experiment was one where unem-ployment was prevalent and where

tunities for education were few. Mr. Tippett felt that a study of history was necessary before his students could begin to tackle the economic problems that confront their industry. His course, there-fore, began with the past and has gradually moved up to the present. about, he continued: "We found when we got started on history that we couldn't stop with

Hillsboro, Itl.

Special Correspondence

In the coal fields of southern Illinois, miners are going to a new type of school. For over two years, under the guidance of a teacher who "rides the circuit," groups of miners and their wives, in eight towns and camps where coal digging is the chief and almost the only business, have been following a course which began with history and which has developed into a serious study of economics. Incidentally, such unplanned features as dramatic art, scene painting and no ceasional banquet, with white

dents, it became evident, couldn't read or write, and the teache wanted to save them embarrassment while they were learning. But the lecture is not all. Students are given a list of questions, answers to which are to be written at home. Some of the questions refer directly to pages in the book, others require original thought. More than half

faithfully, Mr. Tippett estimated All of the women students do it. "How do you ever get so many to home work?" asked a teacher who was listening to Mr. Tippett's story, which he told at a meeting of three branches of the National Women's Trade Union League. "Well, when a very good one is written I read it to the class," he

answered. "Even grown men and women get something out of that.'
The written exercises serve double purpose. They are turned over to the English teachers and used for teaching composition. used for teaching composition These exercises serve also to ac quaint the teachers with the pro-The English teachers, strange as may seem, often have had little ex-perience with miners, although chosen from the staff of local high schools, Mr. Tippett commented. teachers who can present nistory and economics, as well as h, from the point of view of the industrial worker is the pressing problem for the workers' edu novement here, Mr. Tippett said.

Drama Work One of the unexpected turns Tom Tippett's work has taken is in the direction of drama. The Workers' Education Players' have given two productions, and have even gone on tour of the regular playhouses of the about, he continued:

"One of the things I found just studying the life of George after I got there was that everyone, Washington," the miners' teacher old and young, wanted to play. We continued. "We wanted to find out where we got our workers and how that I had seen at Brookwood Labor after I got there was that everyone, that I had seen at Brookwood Labor College. After three months' hard work, we got them ready. We did everything, from making costumes

see them.

Public lectures. Mr. Tippett feels, have been one of the most successful aspects of the whole venture.

About 60 women attended a recent

from Egypt to America the foreigner was quite a different person. Our boys apologized to the 'hunkles' and were willing to say what our civili-zation owed the foreigner."

Mr. Tippett said men were taking more active part in community life, getting things changed rather than resent only a small minority of the miner population, they contain, how-ever, what Mr. Tippett considers

"key people."
Workers' classes in the subdistrict which includes the towns of Taylorville, Pana, Nokomis, Hillsboro and smaller settlements, have been supported by a fund of \$750 a month, half of which is given by the ican Fund for Public Service. Tuition is free to union members and books are given to those who pannot afford to buy them. This is essential in this district because, since the time tha classes started, about two-thirds of the mon have been without any regu-lar employment, Mr. Tippett said. "Your work is very interesting, Mr.

Tippett," commented another teacher who had heard the narrative. "But we know that Tom Tippetts are born and not made. What is going to happen when you leave?"
"I don't think the work depends on just one person," he replied. "Of course I think I had a great deal to

course I think I had a great deal to do with organizing it. But people are coming now because they sincerely want education. Seven boys have continued their studies at Brookwood Labor College. One girl has gone to Bryn Mawr, one to the National Women's Trade Union League school in Chicago. Of course the work does require a sympathetic teacher. But a few young people are coming out of the universities that could certainly qualify for the job, young people who worked in industry themselves in order to understand the situation. There are also the Brooksituation. There are also the Brookwood graduates to count on. I :hink these people could easily learn the method we have developed here and carry it to other fields."

STOCKS AGAIN MOVE IN VERY IRREGULAR WAY

U. S. Steel Leader of the Industrials—Atchison Is Strong

NEW YORK, Dec. 20 (P)—Selling of the Mexican oil shares based on uneasiness over the new laws going into effect next year, contrasted with a resumption of the advance in other sections of the stock market at today's

opening.
Pan-American issues were weak, but domestic oils, such as Atlantic Refining and Union of California, were

in demand.

Atchison, American Ice, Case Threshing Machine and Foundation opened 1 to 2 points higher.

Bear selling of representative industrials was resumed in the subsequent dealings, with particular pressure directed against United States Steel, Baldwin and General Motors, which sold 1 to 2 points lower.

As the leaders began to topple, the initial buying movement in the specialties was checked, and early gains of 1 to 3½ points were reduced or cancelled.

cancelled.

A tendency to lighten speculative holdings of high priced rails caused general recessions in this group, although Southern Railway was an exception, climbing above 125.

Mixed Price Changes

Selling of American Smelting was attributed to the unsatisfactory Mexi-

can law situation.
Foreign exchanges were steady, with sterling holding at \$4.85, and French francs at their stabilized level selightly below 4 cents.
Prices shifter about in the forenoon in a manner bewildering to traders, but there was a strong undercurrent of confidence in various groups, not-

of confidence in various groups, not-ably the baking and local tractions.

Some demand also sprang up for the Influential railroad issues, including Pittsburgh & West Virginia which rose

to 135¼, a record figure.

Union Carbide was pushed up 3½ to 100½, the highest in its history.

There was some contraction around noon of the earlier pressure against a sprinkling of the pivotal industrials. Call loans were maintained at 51/2

Bonds Steady

The calling of some \$40,000,000 in bank loans to meet year-end require-ments, accompanied by a rise in call money to 6 per cent, placed a damper on bond market operations today but failed to cause any marked revision of prices. Trading was featureless, with a steady tone maintained.

Pan-American Petroleum bonds reflected the uneasiness created by the refusal of the Mexican Government to grant an extension of time on the new oil regulations which become effec-tive at the start of the new year. The convertible sixes followed the down-ward trend of the company's shares. Other petroleum issues were little af-

fected.

French obligations aagin were the strongest feature of the foreign division, the government 8s duplicating their high record of 108%, and the 7s selling within a fraction of par.

LONDON STOCKS ARE IRREGULAR

LONDON, Dec. 30-The stock market was irregular today. Speculative issues were easier under end of the year selling which also restricted busi-ness throughout the entire list.

Oils again reflected 9merican selling. Iron and steel issues rallied. Home ralls were higher on better tra%c re-

Argentine rails were well supported. Rubber shares were quiet. Royal Dutch was 32 9-16, Rio Tinto 39 1-16 and Courtaulds 41 3-16. The glit-edge division was firm, sen-

timent being favorably impressed by the response to the Government con-version loan. The war loan sold at 100%.

Foreign issues improved on the present speculative attempt to stabilize the franc, which seems to have been suc-cessful around a figure of 120 to the pound sterling.

SAN FRANCISCO BANKS TO MERGE

SAN FRANCISCO, Dec. 30—The Mercantile Trust Company of California which merges with Amer-ican Bank of San Francisco Dec. 31 and will begin unified operation Jan. 3, under the new title of the American Trust Company has increased its capital from \$8,000,000 to an authorized \$15,000,000 and capital of the subsidiary Mercantile Securities to \$3,750,-

uled to pay an extra \$1.

BALDWIN SALES JUMP

NEW YORK, Dec. 30 (P)—Gross sales of Baldwin Locomotive Works for 1926 are estimated at \$47,000,000, compared with \$27,876,064 in 1925. Samuel M. Vauclain, president, looks for modest business in 1927, with operations around 50 per cent of capacity. He expects nearly all departments will be moved to Eddystone by the end of 1927 and again denies reports that negotiations are under way for the sale of the Philadelphia property.

U. S. STEEL'S STOCKHOLDERS
Common stockholders of the United
States Steel Corporation totaled 86,034
when the books were closed for payment
of the December dividend. 175 more than
the quarter before. At the end of December, last year, there were 90,576 common shareholders. Preferred stockholders eligible for the November dividend
were 73,421, a decrease of 530 from the
preceding quarter.

WAKEFIELD, Mass., Dec. 30 — The Massachusetts 1926 cranberry crop is estimated at 430,000 barrels by the New England Crop Reporting Service, compared with 432,000 in 1923 and record of 455,000 in 1924. The Nation's 1926 crop was 741,000 barrels, compared with 591,-000 in 1925.

The merger takes place upon the basis of two shares of Mercantlle for three shares of American. The board of directors of Mercantile has been increased from 30 to 35. An extra dividend of \$1 will be paid Jan. 1, in addition to the regular \$15 the bank has been paying. American also is scheduled to any an extra \$1.

U. S. STEEL'S STOCKHOLDERS

An increase in the no-par value stock of the California-Eastern Oil Company from 5,000,000 to 10,000,000 shares has been authorized by stockholders who also have approved creation of a \$7,500,000 first mortgage convertible sinking fund 6½ per cent bonded debt for an expansion program 'n Wyoming, Texas and other mid-continent fields.

SAN FRANCISCO—Pacific Telephone & Telegraph Company has called a meeting of stockholders for Feb. 24 to vote on increase in common from \$53,-000,000 to \$103,000,000, preliminary to issuance of rights to preferred and common holders. President Pilisbury indicates that about \$25,000,000 will probably be issued.

BOSTON STOCKS GOOD RESULTS BY NEW HAVEN

Earnings in Closing Months Being Modified by Liberal Expenditures

With only one month, remaining to be reported, it is probable that New Haven Railroad's net income for 1926 will approximate \$5.50 a share on the \$157,117,900 stock, assuming that December about equals the corresponding month of 1925. This would compare with \$4,72 a share in 1925 and \$1.90 a

with \$4.72 a share in 1925 and \$1.90 a share in 1924.

Final results in the closing months of the year are quite evidently being modified by more liberal maintenance expenditures, the management, no doubt, desiring to take advantage of favorable conditions for this purpose. Thus, while gross in November increased \$495.758, or 44, per cent over November, 1925, operating expenses increased \$653.561, due to an increase of \$714.774 in total maintenance, representing an advance of 20.6 per cent in such expenditures over last year. With a larger volume of business transportation expenses were, on the contrary, reduced.

The result of this expanded maintenance program was a net income of

The result of this expanded maintenance program was a net income of only \$702.692 compared with \$360,673 in November, 1925. The ratio of maintenance to gross in November was 35.5 per cent, compared with only 30.7 per cent for the corresponding month last year. For the 11 months, likewise, maintenance was relatively heavier than last year, the ratio to gross being 34.4 per cent, compared with 33.8 per cent for the 11 months. The following figures bring out the significant operating results:

November: 1926 1925

Dividends From Investments Two railroads in which the New Haven has a substantial stock interest have recently declared dividends, and this will help its non-operating income next year as both dividends are payable in January.

The Rutland Railroad declared a dividend of 1 per cent on the professed.

The Rutland Railroad declared a dividend of 1 per cent on the preferred, payable Jan. 20, 1927, the first dividend since 1918. As owner of \$2,352,-050 of this stock, the New Haven will of this stock, the New Haven will get \$23,520 from this source.

New York Ontario & Western, of whose stock New Haven owns \$29,160,000 common, also just declared a 1 per cent dividend, the first since early in 1925, and from this source in January, 1927, New Haven will get \$291,600.

CHICAGO WHEAT PRICES ADVANCE

CHICAGO, Dec., 30 (P)—Wheat scored an early advance in price here today owing more or less to higher Liverpool quotations. Besides, talk was current that exporters were in the market today for wheat from the United States.

Opening %c to %c higher, Chicago wheat prices soon showed moderate further gains.

turther gains.

Corn and oats were also firmer, corn starting at %c to %c up, and later climbing a little more.

Provisions tended to sag. Opening prices today were: Wheat —December 1.36½, May 1.39, July 1.30%, Corn—December 70, May 80%, July 83%, Oats—May 49%, July 47%.

DIVIDENDS

Austin, Nichols & Co. declared the regular quarterly dividend of 1% per cent on the preferred, payable Feb. 1 to stock of record Jan. 15.

Standard Underground Cable Co. declared a 3 per cent extra dividend and clared a 3 per cent extra dividend and the regular quarterly of 3 per cent payable Jan. 10 to stock of record Jan. 4. Holly Sugar Comporation declared the regular quarterly \$1.75 preferred divi-dend, payable Feb. 1 to stock of record Jan. 15.

ATLANTIC, GULF SURPLUS

Atlantic, Gulf & West Indies Steamship Lines had another good month in October, with surplus earnings after taxes and other charges of \$220,023. This compares with a surplus in September of \$219,107. For the 10 months to Oct. 31 Atlantic, Gulf & West Indies reports a surplus of \$533,449, equal to \$3.88 a share on the 137,429 shares of 5 per cent non-cumulative preferred, on which no dividends are being paid. Surplus for the corresponding 10 months of 1925 was \$1,952,879, equal after allowing for 10 months' dividend requirements on the preferred to \$6.90 a share on the 199,512 shares of no-par common stock.

CERTIFIED POTATOES WAKEFIELD, Mass., Dec. 30—A 15 per cent gain in yield per acre and an 11 per cent gain in total production were shown in New England Crop Reporting Service report on the northeastern competitive certified seed potato region. Total production (field run) was estimated at 5.515.278 bushels. compared with 4,960,168 in 1925 and 9,380,860 in 1924. The report showed a 4 per cent cut from last year in acreage that passed final field inspection, as 17,040 acres passed inspection, compared with 17,700 in 1925 and 28,935 in 1924.

ABITIBI ACQUIRES MATTAGAMI MONTREAL, Dec. 30—Abitible Power & Paper Company has purchased the assets of Mattagami Pulp & Paper Company and will continue to operate it with present output of 200 tons daily of easy bleaching and bleached sulphite pulp woods. Operations of Abitibl and Mattagami will be carried on under one management, as 'limits are within 35 to 40 miles. A bond issue will be made to finance a new company, subsidiary to Abitibl, to run Mattagami.

AMERICAN WATER WORKS November net output of American Water Works & Electric Company totaled 142,995,685 kilowatt hours, compared with 117,742,597 kilowatt hours one year ago, a gain of 21 per cent. Eleven months' output was 1,364,596,794 kilowatt hours, compared with 1,191,148,122 kilowatt hours one year ago, a gain of 14½ per cent.

CONTINENTAL GAS & ELECTRIC Continental Gas & Electric Company reports for 12 months ended Nov. 30 net of \$6,353,998 after federal taxes, interest and subsidiary charges but before depreciation and amortization, compared with \$5,123,096 in the previous 12 months. UNITED LIGHT & POWER CO.

United Light & Powers Co.
United Light & Power Company reports for 12 months ended Nov. 30 net
of \$6.767,190 after federal taxes, interest,
subsidiary preferred dividends and prior
preferred dividends, but before depreciation and amortization, compared with
\$6,597,559 in the previous 12 months.

LONDON, Dec. 36—Daily Mail Trust for the year ended Sept. 30, 1926, re-ports net profit of £226,531, compared with £158,232. A dividend of \$3\(\frac{1}{2}\) per cent was declared.

OUTLOOK GOOD

mand Improving

> CHICAGO, Dec. 30 (Special)—Middle western steel producers are concluding a record year in practically every department, and swinging into a new one holding out substantially the same

promise as 1926.

Appraisals of 1927 are tempered chiefly by doubts as to how long the country can absorb iron and steel at the rate of the last two years.

Basically, all important market factors

CANADA TRADE IS MAINTAINED AT HIGH LEVEL

Business Distinctly Better Than for 6 Years-Good Outlook for 1927

OTTAWA, Dec. 36 (Special)—The year 1926 closes exceptionally strong for Canadian business and industry. Domestic trade is at a high level, and most of the industrial concerns have sufficient business on fland to carry them well into the new year.

The Bank of Montreal, in its business summary for December, sounds a decidedly optimistic note and concludes that the year is closing upon a state of trade distinctly better than at any similar period in the last six years.

at any similar period in the last six years.

"The pulp and paper industry maintains an output close to capacity," says the statement; "textile mills are well employed; mercantile mortality, makes favorable comparison with recent years; leather and footwear trades are in better shape; mining production enlarges; iron and steel production and distribution are fairly satisfactory; and while the dry goods trade is in the between seasons stage, sorting orders have been numerous."

The general consensus of opinion is that the improvement in trade and industry which has marked the last 12 months will be continued throughout the year. There is a better balanced condition throughout the Dominion than has prevalled for many years. Less unemployment, increased railway earnings, larger bank deposits, and marked activity in almost every line of industry, all indicate an upward swing in general business.

Western Canada Optimistic

Western Canada Optimistic Optimism is especially strong in western Canada. Returning from a tour of the west a few days ago, Paul Sise, president of the Northern Electric Company, stated that that section tric Company, stated that that section of the country was entering into an era of increased prosperity and the farmers are enjoying a greater measure of happiness because of the fact that the majority of them have been able to discharge all their obligations. Grant Hall, vice-president of the Canadian Pacific Railway, is another prominent Canadian who is enthusiastic about the prospects for the western provinces. In a recent interview he said:

ern provinces. In a recent interview he said:
"The 1926 wheat crop will exceed 400,000,000 bushels. Although the grade was to some extent affected by bad weather in September and October, this has been largely offset by the good prices realized."

good prices realized."

As a result, Mr. Hall found business conditions throughout the west showed evidence of wholesome expansion, and these conditions were not confined to the west, but had their scho all over

the West, but and the better business the Dominion.

An indication of the better business prevailing throughout the country, is that for the first 10 months of 1926 failures totaled 1413, a number less than in any corresponding period of

Metal Market Confident

Confidence prevails in the metal market. The tapering of activity because of inventory considerations and holiday shut-downs is believed to be nearing an end, and reports of liberal specifications against contracts are heard. It is expected that when the next two weeks have passed, shipping on a large scale will be general. The opinion has been ventured that not more than 60 per cent of the users

ping on a large scale will be general.

The opinion has been ventured that not more than 60 per cent of the users of iron and steel have covered for their first quarter requirements. This means that there will be considerable tonnage of material to be bought early in the new year.

Considerable interest attaches to the report that a large railway construction program will probably be carried out during 1927. The Canadian National Railway is said to be drawing up plans for a line tnto the Peace River district, and the Canadian Pacific Railway has several extensions in western Canada in view.

way development would naturally be felt first of all by companies produc-ing such basis commodities as steel. This would include the British Empire Steel Corporation, the Algoma Steel Corporation and the Steel Company of

Equipment Business Gains

Another announcement which reflects improved business conditions is that 400 men are to be taken on at the Kingston plant of the Canadian Locomotive Company, instead of the staff of the plant being laid off, as isusually the case at this season.

The National Steel Castings Company, whose plant at Kingston was recently burned, have decided to reopen at Campbelliford, Ont., with an aggressive policy. The International Harvest r Company, at Hamilton, is running at full capacity, with 3600 people on the pay roll, as compared with only a few last year at this time. The plant is producing material for shipment to export markets in South America, South Africa and Australia. It is announced by the president of the Chrysler Corporation of Canada that the Fisher body plant in Ford City will reopen after having been closed for three years. The English Electric Company of Canada has obtained the contract for complete electrification of the Noranda Mines, Limited, in the Rouyn district of northwestern Quebec.

Steel Mills More Active

The Alberta Rolling Mills Company reports a volume of work that will carry the company well into the new year. The Maple Leaf Steel Mills at Edmonton, Afta., are getting under way and have a considerable program of expansion.

wa, and have a considerable program of expansion.

Prospects for the Sydney Steel industry continue to brighten. It is reported that the steel mills will go on double shift during the first week in January, for the first time in several years. Just recently an order was received by the British Empire Steel Corporation for 15,000 tons of steel rails for the Newfoundland Government lines.

In addition to orders now actually being rolled. "Besco" has at least 40,000 tons of rail orders on its books, or enough to keep the Sydney plant working well into next spring.

Pulp and paper exports continue at a high level. The shipments for Novem was considerably ahead of the \$13,967,287 reported for November, 1925.

1925.

For the first 11 months of the year the total value of pulp and paper exports amounted to \$158,289,495, as compared with a total of \$139,430,915 i. the corresponding months of 1925.

This was an increase for the current year of \$18,858,580, or nearly 14 per

present level of \$51.81, the 1926 high.

The high last year was \$53.96 and low
was \$50.84. The current average of
steel prices, however, is slightly above
that of the closing weeks of 1925, when
it stood at \$51.65 a ton.

There was gain in both imports and
exports of iron and steel products during the year. For the 10 months ended
Oct. 31 imports totaled 954,272 gross
tons compared with 777,630 in the
corresponding period of 1925. Exports
were 1,749,029 tons, compared with 1,394,
were 1,749,029 tons, compared with 1,going foreign steel shipments, however, showed a downward trend toward end of the year.

Formation of a European steel
cartel, for controlling production and
stabilizing prices, was completed in
september. Interests representing
Germany, France, Belgium, and Luxembourg signed the original pact, and
were joined in December by Czechoslovakia, Austria and Hungary.

WORK IS STARTED ON BIG HAMBURG HARBOR

Immense Area of New Basin Now Being Pumped Dry

HAMBURG, Ger. (Special Correspondence) — The tonnage visiting Hamburg is growing by leaps and bounds. To meet new needs, an immense new harbor basin is planned. The first work in connection with it, the pumping dry of the area where the new basin is ment. The sydney Morning Herald

were joined in December by Czechoslovakia, Austria and Hungary.

Pive-Year Agreement

The agreement is for five years, and
the claim was made by industrially
the claim was made by industria brand arm of the Elbe from Neuhot to Waltershof. Such a tunnel has become necessary of account of the rapidly increasing traffic in this part of the Hamburg Harbor area. If the tunnel is to be built, it will, however, have to be started by the beginning of 1928. If delayed beyond that time, Prussia, according to the agreement entered into with Hamburg, may forbid its being built.

The changes now being carried out will push certain portions of the Free Harbor area out of their present position, and the entrance to the customs area will have to be removed to Koehlflet.

No ROOM?

No Room?

San Diego Independent: The Fourth Estate, a weekly devoted to the business of newspaper making, is conducting a symposium in which cultivated men and women all over the country have been asked to say what they think of modern newspapers. Almost without exception they declare too much space and prominence is devoted to crime, sex and piffle. But in spite of these denunciations the great mass of newspapers go on giving pages to criminal affairs and explaining the absence of news regarding religious, educational, scientific and economic matters on the ground that they can't find space for them. . . . If a publisher considers only quick and easy prosperity, the arguments are all in favor of exploiting crime. But newspapers with enduring fame, influence and material prosperity are not built that way. . . The New York Times, The Christian Science Monitor and the Los Angeles Times, suspending today would leave a great gap in American journalism for years to come.

+ + + Arkanas Gazette: The major po-litical divisions of the German Gov-ernment are the Left and the Right. Over here the Democrats are usually left, but the Republicans are by no means right. + + +

U. S. LABOR EXAMPLE

Washington Post: If foreign labor wishes to profit by American example, let it cease fighting its partner, capital, and bend its energies to the creation of governments based upon the popular will. Let it quit its opposition to machinery and its idiotic policy of curtailing individual production. America claims no menopoly America claims no monopoly labor freedom. Its system is not patented. Any country can make its government dependent upon the consent of the governed if its the consent of the governed if its people have the nerve and intelligence to take control. If they lack this nerve and intelligence, American labor cannot be expected to endow them with those qualities. Still less should American labor be expected to encourage foreign labor in its heresies by making alliances with it and furnishing the money for the circulation of ideas. money for the circulation of ideas which, if adopted, would destroy the independence and prosperity of American labor.

"The Investor and the Income Tax" is the title of a booklet that is being distributed by Coffin & Burr, Boston. It contains excerpts from the revenue act of 1926, Treasury Department rulings and decisions, court decisions and many other important matters. The booklet is well indexed and answers almost every question that might arise in connection with investments and the income tax.

INDIAN BANK RATE RAISED

LONDON. Dec. 30—Imperial Bank of India has raised its discount rate to 5 per cent from 4 per cent, at which it had held since June 19.

New Orleans Times-Picayunes
The cornice is going or gone.
Moreover, it is gone because architecture has at last found itself in its new perpendicular form. Seen from the ground, at the acute angle '.at alone is possible in our relatively narrow streets, a cornice of the old style because so exaggerated and difformed that its original purpose is lost and it exaggerated and difformed that its original purpose is lost and it serves often to disfigure and not to ornament the building. Add to that a very considerable and wholly unnecessary increment to the construction cost, and you will find a further valid reason for the cornice's abolishment. Nor is find a further valid reason for the cornice's abolishment. Nor is even that all. Tall buildings have plated a high premium on daylight and the extension of a broad and meaningless roof wing would only cut off a good many feet of needed sky surface from the canyon depths below.

Corvallis (Ore.) Gasette-Times: You could make Billy get his problems by telling him how smart he is, but alas! he knows the system, too, and works it on dad. -+ + +

MOTHERS' PENSION GROWS

VICTORIA, B. C. (Special Correspondence)—The growing scope of British Columbia's pioneer mothers' pension law is shown by figures laid for single dial control operation. The about \$1 per capita from everyone separate them and stations

LOFTIN-WHITE NOTES GIVEN

Reduction of Primary Turns Found Important in Tests

Ohe of the first experimenters to come forward with his results in trying out the Loftin-White circuit is E. W. Whittier, formerly on the radio staff of Lloyd C. Greene of the Boston Globe. We feel sure Mr. Whittier's notes will prove of in-terest and assistance to those who have worked from our articles of Aug. 16, 18, 21, and Oct. 11 and 13. By E. W. WHITTIER

This is not written with the idea of disproving any of the valuable directions for setting up the L-W circuit as given in Oct. 11 and Oct. 13 editions of the Monitor, but rather the reverse. By following those directions it is an extremely simple operation for the more experienced

As mentioned in one of the theoretical articles in the Monitor of Aug. 16, 18, and 21, a smaller value of inductive coupling may be used than in the regular R. F. sets. My experi-ence proves this to be a fact. I started with seven turns of No. 28 wire, space wound, on each of the primary coils. I soon found that I had too many. I could not prevent oscillation at short wavelengths and broad tuning was very evident.

After reducing these coils to four turns on antenna and three turns on plate coil, I found that the oscillation at short waves had disappeared and a slight tendency toward regeneration only remained. I used .005 mfd. coupling condensers. It is a peculiar thing that for local recep tion the three-turn coil coupling the plate of the R. F. tube to the grid of the detector may be moved a foot or more away from the grid coil with-out loss of volume, provided the circuit through it is not broken. On distant stations, however, the position of these coils relative to one another is very important, but once found,

hey can be securely fastened. The number of turns (only three) seems so small that no one could reasonably expect to even approach the oscillatory condition, but it will be found that too close coupling will make the set oscillate on the short waves and prove unstable on long waves. In general, adjust the self-inductance and mutual inductance to avoid escillation at the short waves, and then add capacity in the grid circuits to stop oscillations at

one usually likes to make the set as sensitive as possible so as to be able to pick up the weaker stations, When the set is tuned for local sta-tions, however, the volume is almost described the experiments of 25 years ago when, as a young inventor, he carried out as ambitious an experiment as any inventor could have atmost ago when as a young inventor and they were now affecting my redeath, call. (232—Concert tools, nowever, the volume is almost tools, nowever, the volume load a detector tube operated with a grid condenser and a leak of higher than one megohm. I find that a detector tube operated with a three

before the Legislature here. For the year ending Sept. 30 last mothers' sired. In the Fenway section of Bospension absorbed \$553,871, which would represent a contribution of casting stations, it is very easy to in the Province. During the year and WJZ can be picked up without 1161 families, including 3134 chil- interference from WNAC; WGY withdren, received assistance. The aver-age pension was \$45.92 per month per family. Total payments since the law became effective in 1920 long. To anyone of an experimental

amounts to \$2,252,182. The pensions turn of thought, the chance to study are administered by a nonpolitical the effects of capacitive coupling is Junget of tonies

bottom step of the stairs, wondering what game to play on a rainy Saturday morning. Scottie had been lying quietly at Joan's feet, while she colored some pictures in her mother's magazine, but now that knitted reins that Auntle made for his little mistress went to school

every weekday except Saturday, he

Scottle," She Cried Laughingly. You Are Giving My Feet a Ride!

looked forward to joining her games when she was at home, and at last

Joan. Scottie thought it was no use sitting down to a game so he play-fully took hold of the mat at the the corner?" foot of the stairs and gave it a tug, and Joan found that her feet, which were resting on the mat, were slip-ping away from her. "Oh, Scottie." she cried laughingly, "you are giv-ing my feet a ride!" This gave her beautifully the mats slid along the an idea. "Suppose you give me a ride down the slippery hall," she suggested. She sat down on the mat and Scottie gave it another pull. Scottie loved to be praised, and The linoleum which covered the hall when Joan called, "Gee up, my rein-

ITTLE Joan Nelson and Scottie, mat slide down the hall. "That her doggie, were sitting on the bottom step of the stairs, wondoggie having a corner of the mat in his mouth!" After thinking for a moment, Joan

said: "Oh, Scottie, I've thought of a

lovely game. I'll find those little

me, and you shall be my reindeer and we will pretend that you are pulling my sledge along the ice."

Joan ran to her play cupboard and found the reins. She fastened them to her pet, who looked rather puz-zled because he did not yet understand what his little mistress wanted him to do. Joan put the mat at the top of the hall, sat upon it, and then taking the reins in her hands and turning Scottle toward the other end of the hall, she called, "Run, Scottie!" Scottie ran, and he found that the mat and his little mistress folowed. He understood the game now and pulled her along in fine style. Joan imagining herself a snow princess. To make the game more realis tic, she put her big Teddy Bear in one doorway on the route, and her Baby Teddy Bear at the foot of the stairs. She found her Eskimo doll and made him fish in a corner. Hearing shouts of happy laughter from Joan and yaps of delight from Scottie, Mrs. Nelson came to see what wonderful game her little girl

was playing.
"Look, Mummy," called her little daughter, "my reindeer is drawing my sledge along the ice. Can you see the Polar Bears looking on, and

> "Yes," replied her mother, smiling, "I'm glad my little girl has found such a happy game for a rainy "It was Scottie who suggested it," polished floor."

"Clever little Scott'e!" said Mrs. Nelson, as she bent to pat him, was so well polished that it was deer!" he set off again at a great quite easy for Scottie to make the pace over the slippery ice. EDITORIALS

The Mayor of New York, though not posing as a Puritan nor wholly devoid of knowledge

Cleaning Up the New York Stage

of the more seamy side of city life, is genuinely shocked at the condition of the drama in that city. In an effort to correct it, he has summoned to a conference a number of the leading managers, among whom

will be recognized the names of those most responsible for making the stage a positive menace to public decency and social morals.

Presumably he purposes to appeal to their better natures. So far as coercion goes, or the establishment of an official censorship, experience does not justify much optimism. The publicity which attends the effort to shut down an indecent show, together with the long delay which shrewd lawyers and overworked judges always supply, usually has the effect of enriching the manager thus attacked.

So, presumably, it is moral suasion upon which Mayor Walker relies. We are not sanguine as to the result. But there are five or six men in New York, educated, cultivated, lawabiding, decent and with, so far as is known, not a dollar's interest in any theater, who by concerted action could clean up the stage in a

single season or less.

Let the Mayor turn from the financial beneficiaries of indecency to the owners of the great newspapers who profess to deplore-and we believe honestly do deplore—the decadence of the stage. If he can persuade them to ignore -not to denounce, but to ignore any play which flatly shocks public decency he will have the managers turning to a higher type of drama almost at once. They live on publicity. It is the breath of their nostrils. Sooner than lose it, even the worst would be decent.

Denunciation of an unclean drama is too apt to contribute to its success. Silent dismissal by even a majority of the newspapers would mean financial failure. Managers will tell you that every play presented is a hazardous experiment. The margin between success and failure is so slender that a very slight unfavorable influence may wreck it. Knowledge of the fact that an indecent or immoral play would be severely let alone by the press would impel the manager to reject it forthwith. And the same influence would be potent with the players. Young women who now find their notoriety more widely extended as the lines they speak or the parts they take are the more offensive to public decorum, would hesitate about accepting those parts if they knew that dead silence would attend them.

We commend this line of strategy to Mayor Walker in the event that he fails with the managers. If he should fail to enlist the editors likewise, he could at least feel secure from newspaper attacks because he had not solved the problem of dramatic indecency. In such event he could say to the press that the fault lay with the newspaper proprietors who had refused to apply a remedy already in their hands.

One of the most significant student conferences of recent years is being held this week in Milwaukee. It is esti-

The Milwaukee Student Conference

mated that more than 2500 undergraduates of American colleges have sacrificed the social pleasantries of the holiday season to engage in a group discussion on

the current issues of

social, industrial, national and international life. What these students say and think cannot help but have a potent influence on the shaping of contemporary civilization. History is always largely shaped by that proportionately small group of the younger generation who insist on asking questions. The gravest peril with which organized society is confronted is the all too prevalent tendency of accepting things as they are. It is exceedingly gratifying, therefore, to know that there is a considerable number of youth whose perspective includes not only past accomplishments but also future possibilities.

The Milwaukee Student Conference is meeting under the auspices of the Council of Christian Associations. This organization represents the student departments of the Young Men's Christian Association and the Young Women's Christian Association. State, regional and national councils, composed pretty largely of students themselves, have for the past ten years or more been giving direction to the student Christian movement in the colleges and universities of America. The decisions made at Milwaukee will reflect not the superimposed conclusions of maturity, but the convictions of youth. That does not mean that adult leaders are not present at Milwaukee. For they are. But they are there on the invitation of the students, not for the purpose of telling their undergraduate hearers what to think, but rather to help show them how to think.

These young people are meeting at a particularly strategic time in the world's history. The community life of men and of nations is everywhere in a state of flux. Vast numbers of people are pursuing the ephemeral and passing interests of life. There are others-and we believe their number is increasing—who are determined to grapple with the realities of life. The students who have wended their way to Milwaukee are not willing that truth shall remain upon the scaffold and error upon the throne. They have met to challenge all of those sinister influences that have been and continue to be the undoing of the human race.

It is being recognized at Milwaukee that character is the corner stone of progress and that no social panacea can ever be a substitute for individual and social uprightness. The Rev. G. A. Studdert Kennedy of England, chaplain to the King, has crossed the ocean to attend this Milwaukee conference and for the express purpose of giving emphasis to the primacy of spiritual values. The solution of the gravest interracial and international problems of the present day will be regarded as the inevitable by-product of this personal devotion to truth and high moral living. A student movement foundationed on such an enduring basis cannot help but have a beneficial and stimulating influence on the

thought of the world. These young people merit congratulation on the great adventure of a better civilization into which they have thrown themselves with such eager abandon. There is every reason why the common elements of our common humanity should be permanently enriched as a result of this Milwaukee gathering of tomorrow's pathfinders.

Gradually, it would seem, some of the confusion and perplexities which have made it

The

Economic

Side of

Prohibition

Americans to approach and consider the subject of prohibition and its enforcement are being cleared away. It is undeniable that some have resented, with what they insist is a rightful claim,

the accepted theory that their declared privileges can be curtailed by legislation which they have denounced as sumptuary. Their attitude has surprised no one. The law was not passed at their behest or with their support and sanction. It was not to have been expected that it could be enforced with their approval, or without their determined opposition. Any evil which has become deeply rooted is tenacious. It seldom is dislodged by ukase or rescript. The processes of reform are successfully carried out only when they are supported and more than passively encouraged by those elements of society which initiated and set them in motion.

There seems recently to have taken place a commendable awakening to the realization that, entirely aside from the moral obligation imposed upon the people of the United States by their voluntary enlistment in the campaign to outlaw the saloon, there has entered into the matter the possibly more compelling consideration of self-interest, or communal interest. At the annual session of the American Economic Association, recently held in St. Louis, two distinguished scholars, Prof. T. N. Carver of Harvard and Prof. Irving Fisher of Yale, discussed the matter of prohibition and its enforcement from the standpoint of the expert economist. The speaker first named directed his remarks to the question, "Is Prohibition Worth Enforcing?" deeming it unnecessary to indulge further in discussions of the enforceability of the law. He expressed the conviction that if the American people could be convinced that the act is worth enforcing, they would find ways by which its enforcement would be accomplished. He took occasion to refer to the claims of opponents to prohibition that conditions complained of are due to prohibition. Their figures, he said, simply show conditions under partial nonenforcement, which is much the same as showing the bad effects of drink.

Professor Carver declared that Professor Fisher, who previously had invited any of the delegates present who cared to do so to attack prohibition on purely economic grounds, has demonstrated, beyond any reasonable doubt, that even at its worst prohibition is producing better economic and social results than the system which preceded it. "This is so generally recognized," he declared, "that comparatively few of the opponents of prohibition are willing to take their stand on the negative of that proposition."

Other speakers present offered individual testimony to support the premise that, purely from an economic standpoint, prohibition is worth enforcing. Henry M. Leland, founder of the Cadillac Motor Company, was one of these. "My very decided views on the dry law," he said, "are based on my experience in operating large plants employing from 1000 to 6000 men. I am conthat the open saloon, the the distillery are far and away the most wasteful, the most destructive forces in our country. He concluded: "I am also convinced that the Eighteenth Amendment has already been a great blessing to the United States, that it is largely responsible for and should be credited with many of the elements of present prosperity."

This is not the first time the responsible directors of great industries and the expert economists who are able to analyze the industrial situation accurately have joined in supporting, on the economic side, this ambitious national reform. But there probably has not previously been indicated as complete a unanimity of thought and purpose as at the meeting just held. There is apparent an increasing realization that prohibition, from a business point of view, is a profitable investment. This has been proved by employers and workers to their complete satisfaction. With this fact understood, the cause of measurably complete enforcement of the law is perceptibly advanced. Certainly, it is irretrievably removed from the realm of partisan politics.

The recent decision by the Supreme Court of the United States, upholding the constitutional

Zoning Laws Upheld by the Supreme Court

right of the village of Euclid, O., to impose restrictions upon the uses of land for building purposes, seems to have attracted less public attention than its importance deserves. Behind the issue of a state's

police power in conflict with what are assumed to be "property rights," there was in reality a questioning of the exact nature of the titles to land given by law. By those unfamiliar with the subject it is generally supposed that ownership of a piece of land is of the same character as that of other forms of property, or, as it is sometimes put, the landowner owns from the center of the earth to the sky. But this theory has not been recognized in modern legislation.

Under the British laws the ownership of land has been held to be a qualified right, subject to such conditions and restrictions as the Government might declare. This public interest in the earth's surface has often been ignored. and individuals have been allowed to proceed as if they exercised absolute ownership, even when their policies were opposed to the public welfare. The title "landlord," bestowed on the comparatively few persons who own the soil of Great Britain, indicates that they are considered as "lords" of their possessions, however obtained.

In other countries the right to ownership of land has not carried with it property rights in minerals found beneath its surface. There are also, in practically all civilized countries, provisions, such as the ancient doctrine of "light and air," that emphasize the distinction be-

tween land and other property.

The immediate significance of the decision by the final authority of the United States that the right to own and use land is limited by the public's interest is found in its application to the movement in American cities for better housing conditions and city planning to get rid of objectionable factories and injurious congestion of population. The opinion of the Supreme Court, that state laws regulating the use of land so as to exclude from purely residential districts factories, shops, etc., bear a national relation to the well-being and safety of the community, will strengthen the hands of those who are working to abolish the chaotic conditions existing in practically all the large cities of America. It should also serve to hasten the elimination of the "slum" residential districts, which have been permitted to exist because of a supposition that the owners of the land had the right to use their property as they pleased.

Those who have the cause of international friendship at heart will welcome the movement

Promoting

French

Friendship

which has just been set on foot to establish a British institute in Paris. .. This will aim at providing a center where dents will meet on the common ground of in-terest in natural science

and the arts, and where, at the same time, the means of collaborating in social and athletic activities will be made available to large numbers of men and women of both nations. The attainment of such an end will be effected by the establishment of a residential college in the Cité Universitaire, each hostel in which will be asked to house a percentage of French students.

Such an institution will do valuable service in the field of education, especially because provision will be made to give to the students that tutorial guidance which is so distinctive a feature of English university life. But equally important will be its function in affording many individual members of the two peoples the opportunity of getting to know one another.

The need for the establishment in Paris of a British residential center of education has been felt for a long time. Large numbers of young French people now study the English language and literature, and on the other hand, many English people go to Paris to get the benefit of the fine training which the graduate course at the Paris University provides. For the former it has, of late years, become more and more difficult to perfect themselves in their studies, since the fall of the franc has prevented all but the well-to-do from coming to England. Even the cost of English books is now almost prohibitive, and the result is that both teachers and students are at a serious disadvantage-for it is now an almost accepted axiom of education that a foreign language is best taught by a qualified native of the same country as the student, and not of the country whose language is being taught.

As for the English students, to whom the traditions of the Sorbonne appeal in increasing numbers, many of them go to Paris with only a very vague idea of what they are really seeking. Some of them find themselves completely at a loss when they arrive there, and have considerable difficulty in getting their bearings. It is for this reason that the tutorial guidance which it will be the aim of the institute to provide will have a value very difficult to overestimate.

active support of the Prince of Wales, of Lord Balfour, of Sir Austen Chamberlain, and of the present and at least two past British Ambassadors to France, as well as of many prominent people in the world of education. It is also being assisted in every way by the French Ambassador in London and by the governing body of the University of Paris. At present the question of finance is, very naturally, the chief preoccupation of those responsible for launching the scheme. The sum of £100,000 will be required to enable it to be carried out in an adequate manner, and already donations amounting to several thousands of pounds have been promised. It is not too much to hope that this example will lead to that support coming from both sides of the Channel which will insure the unqualified success of the undertaking.

Editorial Notes

In a delightful letter to The Times, of London, a correspondent deplores the tendency to modernize Sherlock Holmes, and in his reasoning makes some points that may strike many as at least interesting. Sherlock Holmes is one of the static figures of literature, he urges, remaining himself, unchanged, in a whirling stream of adventure. "Micawber, Pickwick, and Sam Weller are similarly static figures." Then he explains that a careful reading of "the whole set of stories" of Sherlock Holmes will result in the reader finding himself in a veritable but vanished London, a silent London of hansom cabs, a dark London of gas lamps, a London without electric glare, without motorcars, without tubes, without wireless, and even without telephones. And how is this for a summing up of his contention: "To drag an aged Sherlock Holmes into the modern jazz world is as bad as banishing Micawber to Australia. Really, some authors don't deserve their own creations."

Once more congratulations are in order for the Boston Traveler for eliminating all accounts of crime and disaster from its front page on Dec. 24. This is the third year in succession that the Traveler has followed this policy, as being in keeping with the season's joyous sentiment. The universal thought of Christmas is that of unselfish service to others, kindliness. peace and joy, and the motive which prompted those responsible for the decision to sanction such a worthy procedure unquestionably helped to spread some measure of joy and good cheer among the paper's readers. The step taken is in the right direction and points to the ultimate attainment of that cherished goal, when newspapers in general will carry daily nothing but constructive news and messages of good cheer.

Chota Hazree in Baroda

on my tray. I open my eyes in time to see a chipmunk drop a piece of toast and frisk away to a porch where he is greeted by indignant crows and myna birds. The bungler! They scold and fly at him, urging to another attempt. At last, with many a sally and retreat, the shy little fellow braves it again with as anxious eye on the sleeping ogress.

Across the floor, up the table leg, onto the tea tray, then away with a morsel of toust that the ogress had broken off for him. Then back again to the porch with his tail billowing behind him. Brave little fellow! How pleased he is with himself! But not for long—a crow robs him of his prize, only in turn to be robbed by a cheeky myna bird not half its size.

Again and again Sir Chipmunk is driven to the table for more toast, only to be robbed by the waiting birds. At last I am quite out of patience with him. The big silly, why doesn't he enjoy a nibble while he is safe on the table away from the thieves? Can't he see that the ogress is quite harmless? Not for worlds would she budge.

Then the sound of running water and Ayah's shuffling step again and away they all scurry.

"Bat' ready, Mem Sahib."

Each morning in the fresh early hours between chota hazree (little breakfast) and the 10 o'clock breakfast we have about visiting musetime law courts valence libradrove about visiting museums, law courts, palaces, libraries, schools, elephant stables, parks, prisons, hospitals and missions. Then too there were calls, dinners, lectures, receptions, etc. Of course, we saw the far-famed jewels and gold and silver treasures of Baroda, which have been the subject of an many payments and many payments. the subject of so many newspaper and magazine articles. Jeweled carpets, golden carriages and bejeweled harness. Elephants with golden howdahs, jeweled trappings and

Early during our visit of a fortnight in Baroda, we were received by Her Highness, the Ranee, who immediately won our hearts. Pretty, gracious, vivacious and intelligent, she talked of her experiences when visiting America and of the problems of the women of India.

"We Indian women can come out of the seclusion of centuries, only as fast as our men assume Western ideals," declared Her Highness. "We lean on our men and could not brave public censure without their support."

And it is easy to see that this must be so. The men

And it is easy to see that this must be so. The men and women must work out this problem together. Curiously enough, we found that in many instances it was the men who took the initiative in abolishing the Zanana, or system of seclusion. One chief told us that for several years he had been trying in vain to persuade his wife

CHOTA HAZREE, Mem Sahib! Good morning, Mem Sahib!" boomed Ayah, as she shuffled into my room with an early breakfast at the hour of the morning when sleep seems sweetest.

How could you, Ayah, how could you?

My room in the Gaekwar's guest house in Baroda was charming, with chints, muslin curtains, wicker furniture, and broad porches fragrant with bougainviles opening into the treetops. And now through drowsy lids I watch great gray monkeys swinging from tree to tree, some of them with their young (the game little things) clinging grimly under them. Fancy the joys of sailing through the air with a trapezing mother! Myna birds, wild parrots, crows and a legion of unfamiliar birds keep up a lively chatter in the trees and on my porches.

I doze off and am awakened by the sharp click of dishes on my tray. I open my eyes in time to, see a chipmunk drop a piece of tests and frisk away to a porch where he drop a piece of tests and frisk away to a porch where he Later his wife told us that she refused to go out except in her own shuttered palanquin.

Later his wife told us that she by no means envied the Western women their freedom. In fact, she thought it quite shocking of us to go about unveiled allowing anybook and everybody to see our faces. She said she had been married twenty years and that she could not imagine any lady being happier than she was.

Custom varies greatly in different parts of India and with different castes and creeds regarding the seclusion of women. Many of the ladies of Baroda, we found, had laid aside their veils and appeared in public with their husbands, though in audiences as at the lectures at Baroda College, they huddled together in seafs reserved for them, not yet being bold enough to sit beside their husbands. Some of them were distressingly shy, while others were slightly firstatious. Coming out of the seclusion of generations is not so simple a matter as it might at first appear.

One event during our visit I set down as supreme because it indicated the breaking down of caste and religious prejudice, which is necessary to a peaceful, united India. This was a dinner given in their home by a Muhammadan judge and his wife at which a Hindu doctor, and his wife and we Christians were guests.

When it is taken into consideration that neither Christians nor Muhammadans are admitted to the inner courts of Hindu Jemples, that orthodox Hindus will eat only food prepared by certain castes, that at railway stations one frequently sees separate drinking water for Hindus and Muhammadans, you can realize what a tremendous force is transforming consciousness to make such a coming together possible.

It seemed that for some years the Hindu lady of

It seemed that for some years the Hindu lady of our party had enjoyed the same liberty as her Western sisters. She and her husband had joined one of the cults that renounce caste. But our hostess had only recently laid aside her veil and had only within a few weeks appeared in the presence of gentlemen other than of her own family. Timidly she greeted us, struggling bravely with her shyness, and seldom did she speak except in reply to a direct question. Her husband, however, was an entertaining talker, keeping up a flow of lively and instructive conversation. He said that though the Koran permitted four wives at one time, he found one a handful, which caused smiles and blushes from his dainty little wife, who looked anything but a handful.

The meal was such as might be served on any English table—soup, fish, chicken, vegetables, pilau, ice cream and sweets of coconuts and dates. Later fruit punch was served in the drawing-room. As is customary with Muhammadans, there were only soft drinks. The Indians finished the repast with pan, a bit of areca nut rolled in a betel leaf with a small amount of lime, which turns the saliva red. I sampled some without the lime and found it some what like nutmeg. Rather pleasant.

There is great serenity and charm about the life in Baroda, where the Gaekwar rules his 2,000,000 subjects with wisdom and equity. The green fields, the bending trees with their swinging monkeys and chattering parrots, the lordly elephants in royal procession, the leisurely crowds strolling through the parks and along the pictur-esque streets, the handsome palaces and fine boulevards all lend grace and beauty to the peacefully flowing life o this little state.

"Chota hazree, Mem Sahib. Today Mem Sahib leaves

"Oh, Ayah! How could you, how could you?" M. S. G.

The World's Great Capitals: The Week in Rome

FTER a month's suspension, La Stampa, one of the A leading Italian newspapers published in Turin, recently made its reappearance, but with a new editorial staff of pronounced Fascist feelings. In Italian journalism the Stampa, which was founded exactly sixty years ago, occupies the second place after the Corriere della Sera of Milan. Its authority, which originally was mainly due to the fact that it was the organ of Giovanni Giolitti, has been steadily increasing, not only in Piedmont, where it has a wide circulation, but also in Rome and in the provinces. The Stampa has always opposed the Fascist régime, but its criticism was always kindly and to the point. On account of its attitude in internal affairs, it has often been suspended by the Fascist authorities, and all the efforts of the prefect of Turin to persuade the owner of the paper, Senator Alfredo Frassati, a close personal friend of Giolitti, by whom he was appointed Ambassador in Berlin in 1920, to sell it were fruitless. Now, however, as a result of recent developments, Senator Frassati has consented to sell his shares of the Stampa to a group of industrialists, whose head is Senator Agnelli, president of the Fiat Automobile Company, and Signor Gualino, president of the Snia Viscosa for the manufacture of artificial silk. The new editor of the paper is Andrea Torre, who at one time supported Signor Nitti's policy, but who joined Fascismo when the latter became the predominant party. + + +

After the clear and unequivocal statement made by Alfredo Rocco, the Minister of Justice, before the Italian Senate, there remains no doubt that the Defense of the Realm Act, in the text approved by the Upper House, concerns exclusively Italian citizens, and that foreigners, either resident in this country or temporary visitors, are not affected by its provisions. With a view to remove that apprehension which was quite naturally felt by foreigners when the draft bill was first published, and which, according to recent reports, is still felt in many foreign countries, it would be fitting to quote Signor Rocco's own words on this subject: "Except for the universally admitted sanction of expulsion, the condition of foreigners in Italy, after the approval of this law, remains precisely the same as in the past."

"The great majority of foreigners coming to Italy," Signor Rocco, "are welcome friends and we are anxious that they find among us the most cordial hos-

The Foreign Press Association in Rome, which is in very flourishing condition and counts nearly 100 members, recently held its annual banquet at the old restaurant La Concordia. For the first time after many years the dinner was attended by journalists of the so-called ex-enemy countries who had been readmitted to the associa-tion in the course of the year. The choice of the restaurant tion in the course of the year. The choice of the restaurant was, indeed, a most happy one, as real "concord" now exists among the representatives of the foreign press in Rome. Many after-dinner speeches were delivered and loud cheers marked the friendly words addressed by Baron de Guillerville, correspondent of Le Temps, to his German colleagues. Although the official languages of the association are French and Italian, Baron de Guillerville preferred to use German in his short address of welcome to the German journalists, who were all very touched by this mark of respect. mark of respect.

Italian engineers are at present studying the possibility of establishing an enormous and most powerful lighthouse on the summit of Mount Etna, the great volcano in Sieily, at a height of more than 10,000 feet above sea level. This lighthouse, which, it is calculated, will be visible from all parts of the Mediterranean, will become the chief guide parts of the Mediterranean, will become the chief guide for airplanes and dirigibles plying across the Mediterranean Sea at night. A similar lighthouse already exists at Dijon, in France, serving as a landmark for the pilots of the Channel air service. The illumination of a very high candlepower will be provided by utilizing the very strong wind which blows constantly with great force over the top of the volcano and which, it is stated, represents a power

equal; if not superior, to that produced by the Niagara Falls. Another project, also under consideration, is that of building an automobile road from Catania to the volcano. This will circle round the slopes of the huge mountain, enabling tourists to obtain a view of all Sicily and even of parts of southern Italy.

Should journalists be considered as industrial laborers or should they be regarded as intellectual workers? This important question affecting the future of the entire class of Italian journalists has just been settled with the acceptance on the part of the Government of the demands put forward by them in a short but most active press em arose enroll Italian journalists in one of the many federations that were created when the Fascist Syndicalist Law began to receive practical application. Quite apart from other considerations, if journalists were still to be looked upon (as they have been for only a few weeks) as ordin employees, they would have lost many advantages coming to them from the special contracts which bind newspapers' publishers and regular correspondents. Italian journalists, indeed, are on the whole rather poorly paid, but enjoy certain other concessions which are not shared by their foreign colleagues, as, for instance, a special compensation, varying according to the number of years in which they have been on the staff of the paper, in the event of their dismissal or "forced" resignation. A deputation of Fascist journalists has now been assured by the new Undersecretary of State for Corporations, Signor Bottai, who is himself a journalist, that they would be considered as intellectual workers, and that accordingly they would be incorporated in the federation of intellectual workers.

Letters to the Editor

Brief communications are welcomed, but the editor must remain sole judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented, Anony-mous letters are destroyed unread.

To Split, or Not to Split, the Infinitive

To the Editor of THE CHRISTIAN SCIENCE MONITOR:

I have noted the little article in the box on the front page of a recent issue of the Monitor regarding the split nfinitive. With me this is a very interesting subject, as I feel that it involves the whole question of the purity and purpose of the English language.

I am not by any means an authority on the subject, but I have read widely and studied the best authors. It is perfectly true that these best authors have split the infinitive for the past 500 years. Probably, indeed, if one should take the trouble to investigate, it would be found that the infinitive has been split ever since it was possible

That, however, is not the important point. Genius uses language to its purpose, grandly, beautifully. We are not all geniuses, however. The fact is not emphasized that the best writers used the split infinitive but rarely. Modern writers are likely to abuse it abundantly.

To take a parallel case, it is no excuse to write an To take a parallel case, it is no excuse to write an undecipherable hand because Horace Greeley so afflicted his typesetters and copy readers. Poor handwriting is no more a symbol of excellence than is a split infinitive.

I love the English language. It has given us the English Bible—how many split infinitives can be found within the covers of this masterpiece of language? Also, Mrs. Eddy has not used it once in her published works.

Advertisement writers use it frequently. Here the pur-pose enters is A diamond, cut and mounted as a gem, is without compare in beauty; it serves the purpose of adornment; it is a symbol of purity and light. A very different treatment is accorded it, however, when the purpose is to drill through the hard rock.

For what purpose do we wish to use the split infinitive?

As an adornment to the language, or to penetrate and arrest the dense or busy consciousness? Hence, let us take for our motto, "Moderation in all things," rather than, "Sie transit down mundi."

V. C.
